Title: Performance Evaluation Studies of Water and Wastewater (OMB Control No. 2080-0021, EPA ICR Number 0234.08). This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Performance Evaluation (PE) studies provide an objective demonstration that participating laboratories are capable of producing valid data for monitored pollutants. Participation in the Water Pollution (WP) studies that relate to wastewater analyses and Water Supply (WS) studies that relate to drinking water analyses are only mandated by the USEPA for those laboratories that receive federal funds to perform these analyses. However, states that certify laboratories for drinking water and wastewater analyses also often require successful participation in these studies for certification. Participation in the Discharge Monitoring Report-Quality Assurance (DMR-QA) studies is mandatory for those designated wastewater dischargers who are conducting self-monitoring analyses required under a National Pollutant Discharge Elimination System (NPDES) permit. EPA initiated these studies and originally administered them as part of the Agency's mandate to

assure the quality of environmental monitoring data. Subsequently, all of these studies have been privatized. Private sector companies manufacture and distribute samples to the participating laboratories who then will submit their analytical results to these PE vendors for evaluation. The PE vendors then send evaluations of the submitted data to the laboratory and any other designated certifying/accrediting authority.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 9.7 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Laboratories and PE Vendors.

Estimated Number of Respondents: 17,168.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 167,348 hours.

Estimated Total Annual Cost:

\$8,252,000, which includes \$0 annualized capital/startup costs and \$2,921,000 annual O&M costs.

Changes in the Estimates: (1) Agency burden has been completely transferred to private sector. PE vendors. (2) The PE Studies WSM and DMRQA TOX are no longer considered a part of this information collection, reducing the number of respondents and their corresponding burdens. (3) Participation in the DMR-QA PE study has decreased from an estimated average of 7000 to 6489 since the last renewal of this ICR, while the estimated average number of analytes measured in this study

increased from 9 to 14. (4) Participation in the WP PE study has increased from an estimated average of 5800 to 6470, and the average number of analytes decreased from 27 to 25. (5) The average number of analytes per participant in the WS PE study increased from 30 to 33. (6) The average cost per analyte charged by the PE vendors was updated since the previous renewal of this ICR.

Dated: February 26, 2003.

Oscar Morales,

Director, Collection Strategies Division.

Title: NESHAP for Publicly Owned Treatment Works (POTW) Facilities (40 CFR part 63, subpart VVV). (OMB Control No. 2060-0428, EPA ICR Number 1891.03). This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: This ICR is prepared for a U.S. Environmental Protection Agency (EPA) rulemaking developed under authority of section 112 of the Clean Air Act (CAA). The rulemaking amends title 40, chapter I, part 63 of the Code of Federal Regulations (CFR) by adding a new subpart VVV—National Emission Standards for Hazardous Air Pollutants from Publicly Owned Treatment Works (POTW) Facilities. Hereafter, this subpart is referred to as the "POTW NESHAP". The POTW NESHAP includes standards for major sources of hazardous air pollutants (HAP). Respondents are owners or operators of waste water treatment processes and operations in the POTW source category.

All new sources must be in compliance with the POTW NESHAP upon startup or the promulgation date, whichever is later. Owners and operators of affected sources are subject to the requirements of 40 CFR part 63, subpart A, the General Provisions, unless the regulation specifies otherwise.

For sources constructed or reconstructed after the effective date of the relevant standard, the POTW NESHAP requires that the source submit an application for approval of construction or reconstruction. The application is required to contain information on the air pollution control that will be used for each potential HAP emission point.

The information in the initial notification and the application for construction or reconstruction will enable enforcement personnel to identify the number of sources subject to the standards and to identify those sources that are already in compliance.

Generally, respondents are required to submit one-time reports of (1) start of construction for new facilities and (2) anticipated and actual start-up dates for
