Title: NESHAP for Publicly Owned Treatment Works (POTW) Facilities (40 CFR part 63, subpart VVV). (OMB Control No. 2060-0428, EPA ICR Number 1891.03). This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: This ICR is prepared for a U.S. Environmental Protection Agency (EPA) rulemaking developed under authority of section 112 of the Clean Air Act (CAA). The rulemaking amends title 40, chapter I, part 63 of the Code of Federal Regulations (CFR) by adding a new subpart VVV—National Emission Standards for Hazardous Air Pollutants from Publicly Owned Treatment Works (POTW) Facilities. Hereafter, this subpart is referred to as the "POTW NESHAP". The POTW NESHAP includes standards for major sources of hazardous air pollutants (HAP). Respondents are owners or operators of waste water treatment processes and operations in the POTW source category.

All new sources must be in compliance with the POTW NESHAP upon startup or the promulgation date, whichever is later. Owners and operators of affected sources are subject to the requirements of 40 CFR part 63, subpart A, the General Provisions, unless the regulation specifies otherwise.

For sources constructed or reconstructed after the effective date of the relevant standard, the POTW NESHAP requires that the source submit an application for approval of construction or reconstruction. The application is required to contain information on the air pollution control that will be used for each potential HAP emission point.

The information in the initial notification and the application for construction or reconstruction will enable enforcement personnel to identify the number of sources subject to the standards and to identify those sources that are already in compliance.

Generally, respondents are required to submit one-time reports of (1) start of construction for new facilities and (2) anticipated and actual start-up dates for

new facilities. All records are to be maintained by the source for a period of at least 5 years.

The POTW NESHAP also requires affected sources to submit a notification of compliance status. This notification must be signed by a responsible company official who certifies its accuracy and certifies that the source has complied with the standards. The notification of compliance status must be submitted within 180 days after the compliance date for the affected source.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 36 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Publicly Owned Treatment Works (POTW) Facilities.

Estimated Number of Respondents: 6.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 216 hours.

Estimated Total Annual Cost: \$12,200.

Changes in the Estimates: There is an increase of 175 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is because of additional respondents, which increased from one to six. Some reductions in burden also occurred because responses are now on an operating year rather than initial year basis.

Dated: February 27, 2003.

Director, Collection Strategies Division.
