We will consider all communications received on or before the closing date for comments. We may change the proposed policy because of the comments received.

Background

The proposed policy will further simplify the certification process pertaining to the requirement for no-smoking placards legible to each occupant seated in compartments where smoking is prohibited. The FAA has determined that a lighted sign can be considered a placard if it is continuously illuminated for the occupants. These signs must illuminate without the cockpit or cabin crew having to turn the signs on, which can be accomplished by hardwiring the signs such that the signs are illuminated whenever the airplane's normal electrical power is on or by providing equivalent control of the signs by software.

Issued in Renton, Washington, on March 9, 2003.

Acting Manager, Transport Airplane
Directorate, Aircraft Certification Service.
