Abstract: For many years, the Board has sponsored consumer surveys to obtain information on the financial behavior of households. The 2004 Survey of Consumer Finance (SCF) will be the latest in a triennial series, which began in 1983, that provides comprehensive data for U.S. families on the distribution of assets and debts, along with related information and other data items necessary for analyzing behavior. These are the only surveys conducted in the United States that provide such financial data for a representative sample of households. Data for the SCF are collected by interviewers using a computer program. While some questions may be deleted and others modified, only minimal

changes will be made to the questionnaire in order to preserve the time series properties of the data. The pretest will be conducted during 2003 and survey would be conducted between May and December 2004.
