

would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222–226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NMFS. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

#### Species Covered in This Notice

This notice is relevant to the following two threatened salmonid ESUs: threatened Central California Coast coho salmon *O. kisutch* and threatened Central California Coast steelhead *O. mykiss*.

#### Modification Request Received

Cressey and Associates requests a modification to permit 1097 for takes of juvenile ESA-listed coho salmon and steelhead associated with studies monitoring the ecology of salmonids in Austin Creek, a tributary of the Russian River in Sonoma County, CA. Cressey and Associates has proposed using electrofishing and snorkel surveys. Presently, permit 1097 authorizes take of adult and juvenile Central California Coast coho salmon, Southern Oregon/Northern California Coasts coho salmon, and Southern California steelhead associated with various scientific research projects in California. Without modification, permit 1097 expires June 30, 2003. This requested modification would add authorization for research activities in the Russian River watershed and extend the expiration of permit 1097 until June 30, 2008.

Dated: March 28, 2003.

#### Endangered and Threatened Species; Take of Anadromous Fish

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of availability and request for comment.

**SUMMARY:** The Puget Sound Treaty Tribes and the Washington Department of Fish and Wildlife submitted to NMFS, pursuant to the protective regulations promulgated for Puget Sound chinook salmon under the Endangered Species Act (ESA), a jointly developed Resource Management Plan (RMP). The RMP specifies the future management of commercial, recreational and tribal salmon fisheries potentially affecting listed Puget Sound chinook salmon from May 1, 2003, through April 30, 2004. This document serves to notify the public of the availability for comment of the proposed evaluation of the Secretary of Commerce (Secretary) as to how the RMP addresses the criteria in the ESA.

**DATES:** Written comments on the Secretary's proposed evaluation must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific Daylight Time on April 17, 2003.

**ADDRESSES:** Written comments and requests for copies of the proposed evaluation should be addressed to Keith Schultz, Sustainable Fisheries Division, National Marine Fisheries Service, 7600 Sand Point Way NE, Seattle, WA 98115-0070. Comments may also be sent via fax to 206/526-6736. The document is also available on the internet at <http://www.nwr.noaa.gov/>. Comments will not be accepted if submitted via e-mail or the internet.

**FOR FURTHER INFORMATION CONTACT:** Susan Bishop, Puget Sound Team Leader, at phone number: 206/526-4587, or e-mail: [susan.bishop@noaa.gov](mailto:susan.bishop@noaa.gov).

**SUPPLEMENTARY INFORMATION:** This notice is relevant to the Puget Sound chinook salmon (*Oncorhynchus tshawytscha*) Evolutionarily Significant Unit (ESU).

#### Background

The Puget Sound Treaty Tribes and the Washington Department of Fish and Wildlife have provided to NMFS a jointly developed Resource Management

Plan for Puget Sound chinook salmon. The RMP encompasses fisheries within the area defined by the Puget Sound Chinook Salmon ESU, as well as the western Strait of Juan de Fuca, which is not within the ESU. Harvest objectives specified in the RMP account for fisheries-related mortality throughout the migratory range of Puget Sound chinook salmon from Oregon and Washington to Southeast Alaska. The RMP also includes implementation, monitoring and evaluation procedures designed to ensure fisheries are consistent with these objectives.

As required by 50 CFR 223.203(b)(6) of the ESA 4(d) rule (50 CFR 223.203), the Secretary must determine pursuant to 50 CFR 223.209 and pursuant to the government-to-government processes therein whether the RMP for Puget Sound chinook salmon would appreciably reduce the likelihood of survival and recovery of the Puget Sound chinook salmon and other affected threatened ESUs. The Secretary must consider how the RMP addresses the criteria in 50 CFR 223.203(b)(4) in making that determination.

#### Authority

Under section 4(d) of the ESA, 16 U.S.C. 1533(d), the Secretary is required to adopt such regulations as he deems necessary and advisable for the conservation of the species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000) specifies categories of activities that contribute to the conservation of listed salmonids or are governed by a program that adequately limits impacts on listed salmonids, and sets out the criteria for such activities. The rule further provides that the prohibitions of paragraph (a) of the rule do not apply to actions undertaken in compliance with a resource management plan developed jointly within the continuing jurisdiction of United States v. Washington by the Puget Sound Treaty Tribes and the State of Washington (joint plan) and determined by the Secretary to be in accordance with the provisions of 50 CFR 223.203(b)(6).

A condensed 15-day written comment period on the Secretary's proposed evaluation is necessary given the short time between the submission of the Resource Management Plan to NMFS on February 21, 2003, and the start of the fishing season on May 1, 2003.

Dated: March 28, 2003.

**Marine Mammals; File No. 984-1587**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Receipt of application for amendment.

**SUMMARY:** Notice is hereby given that Dr. Terrie Williams, Long Marine Lab, Institute of Marine Sciences, University of California at Santa Cruz, 100 Shaffer Road, Santa Cruz, CA 95060, has requested an amendment to scientific research Permit No. 984-1587-02.

**DATES:** Written or telefaxed comments must be received on or before May 2, 2003.

**ADDRESSES:** The amendment request and related documents are available for review upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 713-2289; fax (301) 713-0376; and Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802-4213; phone (562)980-4001; fax (562)980-4018.

Written comments or requests for a public hearing on this request should be submitted to the Chief, Permits, Conservation and Education Division, F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular amendment request would be appropriate.

Comments may also be submitted by facsimile at (301) 713-0376, provided the facsimile is confirmed by hard copy submitted by mail and postmarked no later than the closing date of the comment period. Please note that comments will not be accepted by e-mail or other electronic media.

**FOR FURTHER INFORMATION CONTACT:** Amy Sloan or Ruth Johnson, (301) 713-2289.

**SUPPLEMENTARY INFORMATION:** The subject amendment to Permit No. 984-1587-02, issued on May 10, 2002 (67 FR 35102), is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

Permit No. 984-1587-02 authorizes the permit holder to examine the physiological responses of two adult male dolphins (*Tursiops truncatus*) and three adult female California sea lions (*Zalophus californianus*) during swimming and diving. Testing involves measuring locomotor, thermal, and maintenance costs using voluntary behaviors through training at Long Marine Laboratory. Types of take for dolphins and sea lions include open flow respirometry, swimming, and voluntary breath holding. For the female sea lions, mating with an adult male on temporary loan, ultrasound, blood, milk, saliva, fecal, and urine sampling is also authorized to monitor pregnancy and test the hypothesis that physiological adaptations for the marine environment result in elevated energetic costs in otariids compared to terrestrial mammals.

This amendment request is to supplement the current research program on otariid reproductive energetics with two pregnant adult female California sea lions, which are to be transferred to the pinniped facility at Long Marine Laboratory, University of California at Santa Cruz for short-term holding (up to 16 months). These additions will allow the Permit Holder to fulfill the intent of the original permit, which is to evaluate the energetics of pregnant and lactating sea lions. These steps are necessary due to the non-pregnant status of the three sea lions identified in the original permit. All animals will follow the research protocols of the original permit. Additional research requested includes 1) the measurement of assimilation efficiency by dietary manganese, and 2) inclusion of the offspring in non-intrusive metabolic trials.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: March 20, 2003.

**Endangered Species; File No. 1375**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Issuance of permit.

**SUMMARY:** Notice is hereby given that Dr. Thomas J. Kwak, U.S. Geological Survey, North Carolina Cooperative Fish and Wildlife Research Unit, Box 7617, 201 David Clark Labs, North Carolina State University, Raleigh, NC 27695-7617 has been issued a permit to take shortnose sturgeon, *Acipenser brevirostrum*, for purposes of scientific research.

**ADDRESSES:** The permit and related documents are available for review upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 713-2289; fax (301) 713-0376; and,

Southeast Region, NMFS, 9721 Executive Center Drive North, St. Petersburg, FL 33702-2432; phone (727) 570-5301; fax (727) 570-5320.

**FOR FURTHER INFORMATION CONTACT:** Jennifer Jefferies or Gene Nitta, (301) 713-2289.

**SUPPLEMENTARY INFORMATION:** On April 18, 2002, notice was published in the **Federal Register** (67 FR 19166) that a request for a scientific research permit to take shortnose sturgeon, had been submitted by the above-named Dr. Thomas J. Kwak. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Restoring the shornose sturgeon population in the Roanoke/Albemarle River system in North Carolina is being considered; however, habitat suitability
