

10. Dredging and processing of stream bank materials will not be permitted, and large woody debris cannot be moved during mining operations.

11. All petroleum products will be stored in spill proof containers at a location that minimizes the opportunity for accidental spillage.

13. Dredge operators will anchor the suction dredge to the stream bank when refueling in the water. To minimize accidental spillage, transfer no more than one-gallon of fuel at a time during refueling, and place absorbent material under the tank while refueling to catch any spillage.

14. Dredge operators will disperse all dredge piles and back-fill all dredge holes by the end of the operating season (August 15).

Public participation will be an important part of this analysis. Issues that emerge from public scoping will be used to develop additional alternatives to this proposal. Methods being used to solicit public comment include news releases, weekly radio interviews, and newsletters. A web page for this project can be accessed by logging on to: <http://www.fs.fed.us/rl/clearwater>

The lead agency for this project is the U.S. Forest Service. The Forest Service will consult with the Nez Perce Tribe, County, State, and Federal agencies that display an interest in the project.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519.553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and

concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received in response to this solicitation, including names and addresses of those who comment, will be considered part of the public record on this proposed action and will be available for public inspection. Comments submitted anonymously will be accepted and considered; however, those who submit anonymous comments will not have standing to appeal the subsequent decision under 36 CFR part 215.

Dated: March 20, 2003.

Larry J. Dawson,

Forest Supervisor.
