

and Budget for review under the Paperwork Reduction Act of 1995:

Proposed Project: Design for the Evaluation of the Maternal and Child Health Bureau, Bright Futures for Women's Health and Wellness Initiative and Preliminary Evaluation of Initial Products—New

The HRSA Office of Women's Health (OWH) is developing the Bright Futures for Women's Health and Wellness (BFWHW) Initiative to help expand the scope of women's preventive health activities, particularly related to nutrition and physical activity. A pilot test of the BFWHW health promotion

tools and materials will be conducted in order to improve the effectiveness of the tools themselves, and to gather feedback on productive strategies for disseminating the tools for appropriate use to training providers and community organizations. Thus, the empirical findings from this pilot test will help shape the final BFWHW tool development. This data collection effort will ensure that the HRSA OWH develops targeted and effective tools for translating health prevention recommendations into nutrition and physical activity messages.

Toward this end, data will be collected from women patients,

providers, and representatives of community organizations. Women patients ages 18 and over of various racial and ethnic backgrounds will complete questionnaires at three health centers in different geographic areas of the country. The health care providers at these same sites will also be asked to complete a brief questionnaire. Telephone interviews will be completed with representatives from community organizations located in the service areas of these health centers. The data collection period is estimated to last three weeks.

The estimated response burden is as follows:

Questionnaire	Number of respondents	Responses per respondent	Total responses	Minutes per response	Total burden hours
Woman Patient	2,400	1	2,400	5	200
Provider	18	1	18	5	1.5
Administrator	3	1	3	45	8.25
Total	2,421	2,421	203.75

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: John Morrall, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: April 7, 2003.

Jane M. Harrison,

Director, Division of Policy Review and Coordination.

Availability of Funds

AGENCY: Health Resources and Services Administration (HRSA).

ACTION: Extension of time for application deadline.

SUMMARY: This notice extends the time that applications will be accepted for fiscal year 2003 for the National Health Service Corps (NHSC) Loan Repayment Program. An August 9, 2002 **Federal Register** notice (67 FR 52049) announced that applications must be postmarked no later than March 28, 2003. The deadline for applications has been extended to April 18, 2003. Applications must be mailed to Division

of National Health Service Corps, NHSC Loan Repayment Program, c/o I.Q. Solutions, 11300 Rockville Pike, Suite 801, Rockville, MD 20852, postmarked no later than April 18, 2003.

FOR FURTHER INFORMATION CONTACT: Kay Cook, National Health Service Corps, Bureau of Health Professions, Parklawn Building, Room 8A-55, 5600 Fishers Lane, Rockville, Maryland 20857 (301) 594-4400 (*kcook@hrsa.gov*)

Dated: April 8, 2003.

Submission for OMB Review; Comment Request: Electroencephalogram (EEG) and Event-Related Potential (ERP) Intermediate Phenotypes for Alcoholism in a Low Prevalence American Indian Tribe

Summary: Under the provisions of section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institute on Alcohol Abuse and Alcoholism (NIAAA), the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request to review and approve the information collection listed below.

This proposed information collection was previously published in the **Federal Register** on October 16, 2002, page 63934 and allowed 60-days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Institutes of Health may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Proposed Collection: Title: Electroencephalogram (EEG) and Event-Related Potential (ERP) intermediate phenotypes for alcoholism in a low prevalence American Indian tribe. **Type of Information Collection Request:** New. **Need and Use of Information Collection:** An extensive data set has already been collected by the Laboratory of Neurogenetics, NIAAA, on 294 members of a Southeastern American Indian tribe. We propose to re-contact these individuals to collect additional information. Approximately 100 of the original participants were originally selected as a representative sample of the population. The remaining 194 individuals are family members of alcoholic probands from the population sample. We propose to expand the study to collect (a) measures of intermediate phenotypes for alcoholism and (b) survey-based selected personality characteristics from the same tribal members, Intermediate

phenotypes are biological traits that may be influenced by variation at fewer genes and may mediate different aspects of the disease. The intermediate phenotype measurements that we will collect include resting EEG phenotypes (log voltage alpha (LVA) and beta spectral power), ERPs and heart rate variability (HRV). LVA has been found to be more abundant in alcoholics with co-morbid anxiety disorders. Increased beta power has been associated with increased risk of relapse. P300 ERP amplitude is reduced in alcoholics and their alcohol-naïve children. HRV is a potential intermediate phenotype for alcoholism and major depression. We also propose to administer the Temperament and Character Inventory, a standard, survey-based measure of harm avoidance, novelty seeking, reward dependence, and persistence. The use of such intermediate phenotypes and personality measures is likely to increase our ability to find vulnerability genes for alcoholism. We will use these EEG and EKG intermediate phenotypes and personality dimensions in (1) candidate gene analyses and (2) linkage analyses, utilizing the existing DNA, in order to determine the genes that increase an individual's risk for alcoholism and anxiety disorders.

The re-recruitment of the original study participants will start in spring 2003. The study is expected to run for 6 months. *Frequency of response:* Once per respondent. *Affected Public:* Individuals. *Type of Respondents:* Adults members of the Southeastern American Indian tribe who were participants in the original study.

The annual reporting burden is as follows: *Estimated Number of Respondents:* It is estimated, after a survey by tribal members, that we will be able to re-recruit approximately 280 of the 294 original participants. *Estimated Number of Responses per Respondent:* One response per respondent. *Average Burden Hours per Response:* Three hours per individual, for a total respondent burden of 840 hours. *Estimated Total Annual Burden Hours Requested:* 840 hours. There are no Costs to Respondents to report. There are no Capital Costs to report. There are no Operating or Maintenance costs to report.

Request for Comments: Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility;

(2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways, to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Direct Comments to OMB: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, New Executive Office Building, Room 10235, Washington, DC 20503, Attention: Desk Officer for NIH. To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Mary-Anne Enoch M.D., NIH/NIAAA/DICBR/LNG, 12420 Parklawn Drive, Park 5 Building, Room 451, MSC 8110, Bethesda, MD 20892-8110, or e-mail your request to: maenoch@niaaa.nih.gov. Dr. Enoch can be contacted by telephone at 301-496-2727.

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received within 30-days of the date of this publication.

Dated: February 14, 2003.

Stephen Long,

Executive Officer, NIAAA.

National Institutes of Health

National Cancer Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning

individuals associated with the contract proposals, the disclosure of which would constitute a clear unwarranted invasion of personal privacy.

Name of Committee: National Cancer Institute Special Emphasis Panel, Early Clinical Trials of Imaging Agents.

Date: May 2, 2003.

Time: 8 a.m. to 5 p.m.

Agenda: To review and evaluate contract proposals.

Place: Bethesda Marriott, 5151 Pooks Hill Road, Bethesda, MD 20814.

Contact Person: Kenneth L. Bielak, PhD, Scientific Review Administrator, Division of Extramural Activities, National Cancer Institute, National Institutes of Health, 6116 Executive Boulevard, Room 7147, Bethesda, MD 20892. (301) 496-7576.
