*Type of Request:* Intent to Seek Approval to Reinstatement an Information Collection.

*Abstract:* The Farm and Ranch Irrigation Survey is conducted every 5 years as authorized by the Census of Agriculture Act of 1997 (Pub. L. No. 105-113). The 2003 Farm and Ranch Irrigation Survey will use a probability sample from farms that reported irrigation on the 2002 Census of Agriculture. This irrigation survey will provide a comprehensive inventory of farm irrigation practices with detailed data relating to acres irrigated by category of land use, acres and yields of irrigated and non-irrigated crops, quantity of water applied, and method of application to selected crops. Also included will be 2003 expenditures for maintenance and repair of irrigation equipment and facilities; purchase of energy for on-farm pumping of irrigation water; investment in irrigation equipment, facilities, and land improvement; and cost of water received from off-farm water supplies. Irrigation data are used by the farmers, their representatives, government agencies, and many other groups concerned with the irrigation industry. This survey will provide the only source of dependable, comparable irrigation data by State. The National Agricultural Statistics Service will use the information collected only for statistical purposes and will publish the data only as tabulated totals.
