

interviews to establish usage baselines and monitor trends in some areas for critical use and user characteristics for representative Forest Service wilderness area.

Need and Use of the Information: FS will collect information from visitors to find out how many times they visit, when they plan their next visit, or if they plan to visit at all. Visitors will be asked, when visiting, if they come in groups, and if so, the size of those groups and how long they stay when visiting. Also, visitors will be asked do they use equipment such as stoves, wood for fires and do they have preferences for social conditions? If the information is not collected FS will have no basis for making management decisions and establishing policy for guiding wilderness management in general.

Description of Respondents: Individuals or households.

Number of Respondents: 1,000.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 416.

Rural Development

Title: Rural Empowerment Zones and Enterprise Communities (Ongoing Reporting Requirements).

OMB Control Number: 0570-0027.

Summary of Collection: The Community Renewal Tax Relief Act of 2000 extends the duration for all Empowerment Zone through December 2009. The Rural Empowerment Zones and Enterprise Communities program (EZ/EC) provides economically depressed rural areas and communities with opportunities for growth and revitalization. USDA has designated 120 Champion communities from the EZ/EC applicant communities that have agreed to implement their strategic plans in accordance with the principles of the program and report regularly on their progress.

Need and Use of the Information: Periodic reviews provide the basis for USDA to continue or revoke a designation during the life of the federal program. These reports provide progress on each project that the designee has specified in their implementation plans. A warning letter may be sent to recipients who have been regarded as noncompliance or have made insufficient progress in implementing the strategic plan.

Description of Respondents: State, Local or Tribal Government.

Number of Respondents: 178.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 3,762.

SUPPLEMENTARY INFORMATION:

Title: Importation of Animals and
Poultry, Animal and Poultry Products,
Certain Animal Embryos, Semen, and
Zoological Animals.

OMB Number: 0579-0040.

Type of Request: Extension of
approval of an information collection.

Abstract: The Animal and Plant
Health Inspection Service (APHIS) of
the United States Department of
Agriculture is responsible for, among
other things, preventing the
introduction of exotic animal diseases
into the United States and for rapidly

identifying, containing, and eradicating
such diseases when feasible. In
connection with this mission, APHIS
collects pertinent information from
those individuals who import animals
or poultry, animal or poultry products,
or animal germplasm into the United
States.

This information includes data such
as the origins of the animals or animal
products to be imported, the health
status of the animals or the processing
methods used to produce animal
products to be imported, and whether
the animals or animal products were
temporarily offloaded in another
country during their transit to the
United States. We need this information
to help ensure that these imports do not
introduce exotic animal diseases into
the United States.

We use a variety of information
collection procedures, devices, and
forms including, but not limited to:
Health certificates, import permits, ear
tags, leg bands, specimen submission
forms, inspection reports, cooperative
and trust fund agreements, and
certification statements.

We are asking the Office of
Management and Budget (OMB) to
approve our use of these information
collection activities for an additional 3
years.

The purpose of this notice is to solicit
comments from the public (as well as
affected agencies) concerning our
information collection. These comments
will help us:

(1) Evaluate whether the collection of
information is necessary for the proper
performance of the functions of the
Agency, including whether the
information will have practical utility;

(2) Evaluate the accuracy of our
estimate of the burden of the
information collection, including the
validity of the methodology and
assumptions used;

(3) Enhance the quality, utility, and
clarity of the information to be
collected; and

(4) Minimize the burden of the
information collection on those who are
to respond, through use, as appropriate,
of automated, electronic, mechanical,
and other collection technologies, e.g.,
permitting electronic submission of
responses.

Estimate of burden: The public
reporting burden for this collection of
information is estimated to average
0.0369992 hours per response.

Respondents: Entities that import
animals or poultry, animal or poultry
products, and animal embryos,
germplasm, and semen.

*Estimated annual number of
respondents:* 169,806.
