SUPPLEMENTARY INFORMATION: A plan amendment is needed because the existing 1984 Hollister RMP does not address management of the Fort Ord Project area. Approximately 7,200 acres of former Army lands at Fort Ord were transferred to the BLM in October 1996, and approximately 8,000 additional acres are expected to be transferred to the BLM in the coming years. The new "public lands" transferred to the BLM are part of a base-wide mitigation strategy to assure the survival of numerous rare plants and animals. Reuse of the base is centered upon the three keystones of "Education, Economics and Environment (The Three E's)". BLM's management of these new public lands is currently governed by the BLM/Army Memorandum of Understanding (April 19, 1995), the U.S. Army Letter of Transfer (October 18, 1996), and the Fort Ord Multi-Species Habitat Management Plan. Preliminary issues and management concerns have been identified by BLM personnel, other agencies, and in meetings with individuals and user groups, including: management and protection of sensitive, rare, threatened or endangered species; fire management; management integration with other agencies; management of recreation/visitor use and safety; management of livestock grazing; management consistent with community; and access and transportation on the public lands. Disciplines involved in the planning process will include specialists with expertise in wildlife management, minerals and geology, outdoor recreation, archaeology, lands and

realty, botany, soils, information technology, sociology, and economics.

Fort Ord Project Manager.
