

Pharmaceutical Assistance and AIDS Drug Assistance Program, and the Health Insurance Program. The primary purposes of the CADR are to: (1) Characterize the organizations from which clients receive services; (2) provide information on the number and

characteristics of clients who receive CARE Act services; and (3) enable HAB to describe the type and amount of services a client receives. In addition to meeting the goal of accountability to Congress, clients, advocacy groups, and the general public, information

collected on the CADR is critical for HRSA, State and local grantees, and individual providers to assess the status of existing HIV-related service delivery systems.

The estimated response burden for CARE Act grantees is estimated as:

Title under which grantee is funded	Estimated number of grantees	Estimated (median) number of providers	Estimated hours to coordinate receipt of data reports from providers	Estimated total hour burden for grantees
Title I only	51	107	40	2,040
Title II only	59	112	40	2,360
Title III only	337	1	8	2,696
Title IV only	90	1	16	1,440
Total	537	8,536

The estimated response burden for service providers is estimated as:

Title under which provider is funded	Estimated number of provider respondents	Estimated responses per provider	Estimated hours per response	Estimated total hour burden
Title I only	1,175	1	24	28,200
Title II only	995	1	24	23,880
Title III only	248	1	40	4,800
Title IV only	98	1	40	3,920
Funded under multiple titles	394	1	40	15,760
