Bureau of the Census

[Docket Number 030328074-3074-01]

Revised Confidentiality Criteria for Bureau of the Census Public Use Data Products

AGENCY: Bureau of the Census, Department of Commerce.

ACTION: General notice.

SUMMARY: The Bureau of the Census (Census Bureau) is issuing this Notice to update the criteria used to assess and review public use data products prior to their release. The criteria help ensure that confidential information is not inadvertently disclosed.

DATES: This notice is effective May 5, 2003.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information on this Notice should be directed to Laura Zayatz, Chair, Disclosure Review Board, Statistical Research Division, U.S. Census Bureau, Room 3209, Federal Building 4, Washington, DC 20233,

(301) 763-4955 or by fax at (301) 457-2299.

SUPPLEMENTARY INFORMATION:

Background

Title 13, United States Code, Section 9, requires the Census Bureau to protect the confidentiality of individual respondents. Title 13 also requires the Census Bureau to release information from its data collections to the public. In order to comply with the latter requirement, while protecting respondents' confidentiality, the Census Bureau has developed standard procedures for protecting its data products from disclosure of identifying information. A **Federal Register** Notice (46 FR 22017) published on April 15, 1981, described those procedures.

Since that Notice appeared, some methodological improvements have been introduced and additional formal review has been instituted. Specific changes to the earlier criteria are the following items under the "Criteria for Releasing Public Use Microdata" section of this Notice.

- Paragraph (4). To ensure confidentiality protection, the Census Bureau now requires the completion of a Checklist on Disclosure Potential of Data.

- Paragraph (4)(e). To better protect the confidentiality of data, the Census Bureau may require the use of data swapping. This technique is discussed further in that paragraph.

- Paragraph (5). The name of the Microdata Review Panel was changed to the Disclosure Review Board.

- "Criteria for Releasing Public Use Tabular Data" section. This entire section is new. In 1995, the routine review performed by the Disclosure Review Board was extended to include tabular data as well as microdata.

Also, the scope of the Disclosure Review Board was enlarged to include setting disclosure limitation rules, monitoring the Census Bureau's adherence to its confidentiality policy requirements, and resolving any problems, questions, and issues not covered by the general criteria described in the earlier **Federal Register** Notice. This Notice updates the information previously published and includes criteria for releasing tabular data as well as microdata.

Confidentiality Criteria for Census Bureau Public Use Data Products

Data Subject to Disclosure Protection

All data released to the public are subject to disclosure protection. These public use data products include both microdata and tabular data. Microdata
