BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. (as shown in Attachment 1); License Nos. (as shown in Attachment 1); EA-03-086]

All Operating Power Reactor Licensees; Order Modifying Licenses (Effective Immediately)

The licensees identified in Attachment 1 to this Order hold licenses issued by the U.S. Nuclear Regulatory Commission (NRC or the Commission) authorizing operation of nuclear power plants in accordance with the Atomic Energy Act of 1954 and Title 10 of the *Code of Federal Regulations* (10 CFR) part 50. Commission regulations at 10 CFR 50.54(p)(1) require these licensees to maintain safeguards contingency plan procedures in accordance with 10 CFR part 73, Appendix C. Specific safeguards requirements for reactors are contained in 10 CFR 73.55.

On September 11, 2001, terrorists simultaneously attacked targets in New York, NY, and Washington, DC, utilizing large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees, and eventually Orders to selected licensees, to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. The Commission has also communicated with other Federal, State and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the nature of the current threat. In addition, the Commission has been conducting a comprehensive review of its safeguards and security programs and requirements. As part of this review, the Commission issued Orders to the licensees of all operating power reactors on February 25, 2002, to implement interim compensatory measures (ICMs) to enhance physical security of licensed operations at these facilities. In addition, the Commission issued Orders to all operating power reactor licensees on January 7, 2003, to enhance access authorization requirements.

As a result of information provided by the intelligence community concerning the nature of the threat and the Commission's assessment of this

information, the Commission has determined that a revision is needed to the Design Basis Threat (DBT) specified in 10 CFR 73.1. Therefore, the Commission is imposing a revised DBT, as set forth in Attachment 2¹ of this Order, on all operating power reactor licensees. The revised DBT, which supercedes the DBT specified in 10 CFR 73.1, provides the Commission with reasonable assurance that the public health and safety and common defense and security continue to be adequately protected in the current threat environment. The requirements of this Order remain in effect until the Commission determines otherwise. To address the DBT set forth in Attachment 2 of this Order, all licensees must revise their physical security plans, safeguards contingency plans, and guard training and qualification plans that are required by 10 CFR 50.34(c), 50.34(d), and 73.55(b)(4)(ii), respectively.

In order to provide assurance that licensees are implementing prudent measures to protect against the revised DBT, all licenses identified in Attachment 1 to this Order shall be modified to require that the physical security plans, safeguards contingency plans, and the guard training and qualification plans required by 10 CFR 50.34(c), 50.34(d), and 73.55(b)(4)(ii) be revised to provide protection against this revised DBT. Consistent with the provisions of 10 CFR 73.55(a), the licensee may provide measures for protection against the DBT specified in Attachment 2 to this Order other than those required by 10 CFR 73.55 if the licensee demonstrates: (1) That the measures have the same high assurance objective as specified in 10 CFR 73.55(a); and (2) that the overall level of system performance provides protection against the DBT specified in Attachment 2 to this Order equivalent to that which would be provided by 10 CFR 73.55(b) through (h) and meets the general performance requirements of 10 CFR 73.55. Upon completion of NRC review and approval of the revised physical security plans, including pertinent requirements of the Order issued on February 25, 2002, safeguards contingency plans, and guard training and qualification plans, and their full implementation, the Commission will consider requests to relax or rescind, either in whole or in part, the requirements of the Order issued on February 25, 2002, imposing ICMs. In addition, pursuant to 10 CFR 2.202, I find that in the circumstances described above, the public health, safety, and

interest and the common defense and security require that this Order be immediately effective.

Accordingly, pursuant to sections 103, 104, 161b, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR parts 50 and 73, it is hereby ordered, effective immediately, that all licenses identified in attachment 1 to this order are modified as follows:

A. 1. All licensees shall, notwithstanding the provisions of any Commission regulation, license, or order to the contrary, revise their physical security plans and safeguards contingency plans, prepared pursuant to 10 CFR 50.34(c) and 50.34(d), to provide protection against the DBT set forth in Attachment 2 to this Order. In addition, all licensees shall, notwithstanding the provisions of any Commission regulation, license, or order to the contrary, revise their guard training and qualification plans, required by 10 CFR 73.55(b)(4)(ii), to implement the DBT set forth in Attachment 2 to this Order. The licensees shall submit the revised physical security plans, safeguards contingency plans, and guard training and qualification plans, including an implementation schedule, to the Commission for review and approval no later than April 29, 2004.

2. The revised physical security plans, revised safeguards contingency plans, and revised guard training and qualification plans, must be fully implemented by the licensees no later than October 29, 2004.

B. 1. All licensees shall, within thirty-five (35) days of the date of this Order, notify the Commission, (1) if they are unable to comply with any of the requirements of this Order, (2) if compliance with any of the requirements is unnecessary in their specific circumstances, or (3) if implementation of any of the requirements would cause the licensee to be in violation of the provisions of any Commission regulation or the facility license. The notification shall provide the licensee's justification for seeking relief from, or variation of, any specific requirement.

2. Any licensee that considers that implementation of any of the requirements of this Order would adversely impact safe operation of the facility must notify the Commission, within thirty-five (35) days of this Order, of the adverse safety impact, the basis for its determination that the requirement has an adverse safety impact, and either a proposal for achieving the same objectives of this Order, or a schedule for modifying the

facilities to address the adverse safety condition. If neither approach is appropriate, the licensee must supplement its response to Condition B.1 of this Order to identify the condition as a requirement with which it cannot comply, with attendant justifications as required in Condition B.1.

C. All licensees shall report to the Commission, in writing, when they have fully implemented the approved revisions to their physical security plans, safeguards contingency plans, and guard training and qualification plans, to protect against the DBT described in Attachment 2 to this Order.

D. Notwithstanding the provisions of any Commission regulation, license, or order to the contrary, all measures implemented or actions taken in response to this Order shall be maintained until the Commission determines otherwise, except that licensees may make changes to their revised physical security plans and safeguards contingency plans and guard training and qualification plans if authorized by 10 CFR 50.54(p).

Licensee responses to Conditions A.1, B.1, B.2, and C above, shall be submitted in accordance with 10 CFR 50.4. In addition, licensee submittals that contain safeguards information shall be properly marked and handled in accordance with 10 CFR 73.21.

The Director, Office of Nuclear Reactor Regulation, may, in writing, relax or rescind any of the above conditions upon demonstration by the licensee of good cause.

In accordance with 10 CFR 2.202, the licensee must, and any other person adversely affected by this Order may, submit an answer to this Order, and may request a hearing on this Order, within thirty-five (35) days of the date of this Order. Where good cause is shown, consideration will be given to extending the time to request a hearing. A request for an extension of time in which to submit an answer or request a hearing must be made in writing to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and include a statement of good cause for the extension. The answer may consent to this Order. Unless the answer consents to this Order, the answer shall, in writing and under oath or affirmation, specifically set forth the matters of fact and law on which the licensee or other person adversely affected relies and the reasons as to why the Order should not have been issued. Any answer or request for a hearing shall be submitted to the Secretary, Office of the Secretary of the

¹ Attachment 2 contains safeguards information and will not be released to the public.

Commission, U.S. Nuclear Regulatory Commission, ATTN: Rulemakings and Adjudications Staff, Washington, DC 20555-0001. Copies also shall be sent to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; to the Assistant General Counsel for Materials Litigation and Enforcement at the same address; to the Regional Administrator for NRC Region I, II, III, or IV, as appropriate for the specific facility; and to the licensee if the answer or hearing request is by a person other than the licensee. Because of possible disruptions in delivery of mail to United States Government offices, it is requested that answers and requests for hearing be transmitted to the Secretary of the Commission either by means of facsimile transmission to 301-415-1101 or by e-mail to hearingdocket@nrc.gov and also to the Office of the General Counsel either by means of facsimile transmission to 301-415-3725 or by e-mail to OGCMailCenter@nrc.gov. If a person other than the licensee requests a hearing, that person shall set forth with particularity the manner in which his or her interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is requested by the licensee or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

Pursuant to 10 CFR 2.202(c)(2)(i), the licensee may, in addition to demanding a hearing, at the time the answer is filed or sooner, move the presiding officer to set aside the immediate effectiveness of the Order on the ground that the Order, including the need for immediate effectiveness, is not based on adequate evidence but on mere suspicion, unfounded allegations, or error.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section III above shall be final thirty-five (35) days from the date of this Order without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section III shall be final when the extension expires if a hearing request has not been received. *An answer or a request for hearing shall not stay the immediate effectiveness of this Order.*

For the Nuclear Regulatory Commission.

Dated this 29th day of April 2003.

Samuel J. Collins,

Director, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-1201]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for the Renewal of Special Nuclear Materials License for Framatome Advanced Nuclear Power, Inc., Lynchburg, VA**I. Introduction**

The U.S. Nuclear Regulatory Commission (NRC) is considering renewal of NRC Special Nuclear Material License SNM-1168 for Framatome Advanced Nuclear Power, Inc. (FANP) in Lynchburg, VA. Initial operations at the FANP Lynchburg site with enriched uranium were authorized in December 1969. The license was renewed in April 1976, June 1983, and September 1991. The license was extended for 18 months on January 4, 2001.

By application dated March 28, 2002, FANP requested renewal of SNM-1168. FANP submitted an Environmental Report by letter dated March 28, 2002. The NRC published a **Federal Register** notice on August 9, 2002 (67 FR 51894), with a Notice of Opportunity for Hearing on the proposed action. No requests for a hearing were received.

The FANP facility conducts three types of operations: producing fuel assemblies for use in commercial light-water reactors, support activities for nuclear reactor field service operations, and general manufacturing. The activities covered under license SNM-1168 are the fabrication of fuel assemblies and support activities for nuclear reactor field service operations. The proposed renewal of license SNM-1168 is necessary for FANP to continue operation.

The NRC staff performed an Environmental Assessment (EA) in support of its review of FANP's renewal request, in accordance with the requirements of 10 CFR part 51. The conclusion of the EA is a Finding of No Significant Impact (FONSI) for the proposed licensing action.

II. EA Summary

The scope of the EA included an evaluation of the activities authorized under license SNM-1168, as well as other activities which could potentially affect licensed activities. Principal activities in the facility include the processing of low-enriched uranium ($\leq 5.1\%$), received as UO_2 pellets. Other activities conducted in conjunction with nuclear fuel fabrication include: fabrication of poison rods, download of

finished fuel bundles and rods, repair of returned fuel assemblies, laboratory operations and waste disposal operations.

On the basis of its assessment, the NRC staff has concluded that the environmental impacts associated with the proposed license renewal for continued operation at the Lynchburg facility would not be significant and, therefore, the proposed action does not warrant the preparation of an environmental impact statement. All existing requirements for environmental monitoring and protection will be continued to evaluate future impacts.

III. Further Information

The full EA (ADAMS Accession No. ML030940720) and the following documents related to the proposed action, are available for inspection at NRC's Public Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>: (1) Framatome ANP, Inc., Response to the Request for Additional Information for License Renewal, SNM-1168, Docket No. 70-1201, November 8, 2002 (ADAMS Accession No. ML023230413); (2) Letter to Peter Lee re: Special Nuclear Material License Renewal of Framatome ANP, Mt. Athos Road Facility, #2708, Campbell County, VA, October 2, 2002 (ADAMS Accession No. ML022810449); (3) Application for License Renewal of SNM-1168, Docket No. 70-1201, March 28, 2002 (ADAMS Accession No. ML020940468); and, (4) Supplement to the Environmental Report, SNM-1168, Docket No. 70-1201, March 28, 2002 (ADAMS Accession No. ML020930031). These documents and B&W Fuel Company's letter to Robert Pierson re: Exemption from Emergency Plan, March 21, 1994, may also be examined and copies for a fee at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. Any questions with respect to this action should be referred to Ms. Julie Olivier, Fuel Cycle Facilities Branch, Division of Fuel Cycle Safety and Safeguards, U.S. Nuclear Regulatory Commission, Mail Stop T-8 A33, Washington, DC 20555-0001. Telephone (301)415-8089.

Dated in Rockville, Maryland, this 28th day of April, 2003.

For the Nuclear Regulatory Commission.

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-143]

Environmental Assessment and Finding of No Significant Impact of License Amendment for Nuclear Fuel Services, Inc.

AGENCY: Nuclear Regulatory Commission.

ACTION: Amendment of Nuclear Fuel Services, Inc., Materials License SNM-124 to include source reduction measures as authorized decommissioning-related activities.

Environmental Assessment*Introduction*

The U.S. Nuclear Regulatory Commission (NRC) is considering the amendment of Special Nuclear Material License SNM-124. The proposed amendment will allow the licensee to reduce the source term at the site through removal of contaminated soil from the Nuclear Fuel Services (NFS) site in Erwin, Tennessee. The NRC has prepared an Environmental Assessment (EA) in support of NFS' amendment request, in accordance with 10 CFR part 51. The conclusion of the EA is a Finding of No Significant Impact (FONSI) for the proposed licensing action.

Background

By request for license amendment dated April 3, 2002, NFS applied for approval to reduce the source term at the site by removal of contaminated soil to levels at or below those protective of worker health as defined in 10 CFR 20.1201 (Ref. 1).

NFS began operations at the Erwin, Tennessee facility in 1957. Through the years, portions of the site became contaminated with radioactive material. From 1957 until 1981, portions of the site were used for disposal, through burial, of radioactive waste in accordance with 10 CFR 20.304, which allowed for this type of disposal. The regulations in 10 CFR part 20 have since been revised and § 20.304 no longer exists and burial disposal is no longer allowed. The soil in the area of the disposal site is now considered to be contaminated. Soils in other portions of the site are also contaminated due to accidental spills of licensed material and from inadvertent leaks from process equipment.

Review Scope

In accordance with 10 CFR part 51, this EA serves to (1) present information and analysis for determining whether to
