BILLING CODE 3510-DR-5

SUMMARY: In the **Federal Register** of March 4, 2003 (68 FR 10210), the Consumer Product Safety Commission published a notice in accordance with provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) to announce the agency's intention to seek extension of approval of the collection of information in the Safety Standard for Cigarette Lighters (16 CFR part 1210). No comments from members of the public were received in response to the **Federal Register** notice. By publication of this notice, the Commission announces that it has submitted to the Office of Management and Budget (OMB) a request for extension of approval of that collection of information without change for three years from the date of approval.

The Safety Standard for Cigarette Lighters requires disposable and novelty lighters to be manufactured with a mechanism to resist operation by children younger than five years of age. Certification regulations implementing

the standard require manufacturers and importers to submit to the Commission a description of each model of lighter, results of prototype qualification tests for compliance with the standard, and a physical specimen of the lighter before the introduction of each model of lighter in commerce.

The Commission uses the records of testing and other information required by the certification regulations to determine that disposable and novelty lighters have been tested and certified for compliance with the standard by the manufacturer or importer. The Commission also uses this information to obtain corrective actions if disposable or novelty lighters fail to comply with the standard in a manner that creates a substantial risk of injury to the public.
