Health Resources and Services Administration

HRSA-03-099 Fiscal Year 2003 Competitive Cycle for the Bioterrorism Training and Curriculum Development Program (BCDF) 93.996

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Correction of deadline date.

SUMMARY: In notice document FR Doc. 03-10934, in the issue of Monday, May 5, 2003, make the following correction:

On page 23730, under the section Application Requests, Availability, Deadline and Addresses, in the third column, the application deadline date should read June 30, 2003.

Dated: May 9, 2003.

Jane M. Harrison,

Director, Division of Policy Review and Coordination.

[FR Doc. 03-12042 Filed 5-14-03; 8:45 am]

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

Program Exclusions: April 2003

AGENCY: Office of Inspector General, HHS.

ACTION: Notice of program exclusions.

During the month of April 2003, the HHS Office of Inspector General imposed exclusions in the cases set forth below. When an exclusion is imposed, no program payment is made to anyone for any items or services (other than an emergency item or

service not provided in a hospital emergency room) furnished, ordered or prescribed by an excluded party under the Medicare, Medicaid, and all Federal Health Care programs. In addition, no program payment is made to any business or facility, e.g., a hospital, that submits bills for payment for items or services provided by an excluded party. Program beneficiaries remain free to decide for themselves whether they will continue to use the services of an excluded party even though no program payments will be made for items and services provided by that excluded party. The exclusions have national effect and also apply to all Executive Branch procurement and non-procurement programs and activities.

The human immune response involves a complex series of molecular interactions to produce a beneficial response to foreign invasion within the body. These molecular interactions orchestrate the specific responses of innate and adaptive immunity. When these interactions break down, immune related disorders such as cancer and sepsis arise.

This invention describes an advance in understanding the regulation of the immune response. Triggering Receptors in Myeloid Cells (TREM) recently were discovered to modulate innate and adaptive immunity. Specifically, TREM1 amplifies the response to sepsis in innate immunity by activating neutrophils and other leukocytes; and TREM2 potentiates dendritic cell maturation in adaptive immunity. This invention describes a new inhibitory TREM like Transcript, TLT-1.

TLT-1 is the first inhibitory receptor discovered to reside within the TREM gene locus. This discovery implies the receptor has an important regulatory role in both innate and adaptive immunity. Structurally, TLT-1 also possesses inhibitory domains that indicate this regulatory function. TLT-1 is highly expressed in peripheral blood platelets and may modulate many other types of myeloid cells. Potential therapeutic implications are for immune disorders, cancer, septic shock, infectious disease, stroke, heart disease, myocardial infarction, vascular disorders, and other platelet-associated disorders.

17-AAG Treatment of Diseases Sensitive to c-KIT Down Regulation
Gerard Fumo and Len Neckers (NCI)
DHHS Reference No. E-256-2002 filed
22 Oct 2002

This invention describes the use of 17-allylamino-17-demethoxygeldanamycin (17-AAG), a derivative of geldanamycin, which inhibits mutated KIT protein kinase activity (the product of proto-oncogene c-KIT). This kinase has been identified as the protein responsible for transformation of certain human cell types into pathologic cells. The invention is predicated on the discovery of a new method of inhibiting the activity of a mutated, constitutively active form of the tyrosine kinase, KIT. The method involves the administration of 17-AAG to a cell expressing the
