## **NUCLEAR REGULATORY COMMISSION**

**[Docket No. 40-8989]**

### **Envirocare of Utah, Inc.; Notice of Receipt of Amendment Request and Opportunity To Request a Hearing**

#### **I. Introduction**

The U.S. Nuclear Regulatory Commission (NRC) has received, by letter dated March 27, 2003, a request from Envirocare of Utah, Inc., for approval of a license amendment to Materials License SMC-1559 to authorize it to receive and dispose of byproduct material, as defined in section 11e.(2) of the Atomic Energy Act (AEA) of 1954, as amended (hereafter referred to as 11e.(2) byproduct material), with concentrations of Ra-226 up to 100,000 pico curies per gram (pCi/g). Envirocare also requested approval of a revision to its License Application to allow disposal of containerized waste.

The Envirocare facility, located at Clive, Utah, is licensed by NRC to accept and dispose of 11e.(2) byproduct material received from others. Currently, Envirocare's license restricts the concentration of Ra-226 in 11e.(2) byproduct material received by Envirocare to 4000 pCi/g. Additionally, Envirocare's License Application discusses disposal of unpackaged 11e.(2) byproduct material. The unpackaged material is to be put into the disposal cell in layers not exceeding 12 inches.
