

notification and automated meter reading. In order to help us in evaluating the applicability of BPL technology to power line carrier systems, we seek input on the following questions:

- Will the power line carrier systems currently deployed by the utility companies to control and monitor the electrical system be replaced in the future with the new high speed BPL equipment?
- How would the utility companies deploy these new control systems and how would these new systems coexist with the older control systems?
- Should power line carrier systems using BPL technology be subject to the coordination process in the current database maintained by UTC?
- Are any changes needed in the regulations governing power line carrier systems? Should power line carrier systems using BPL technology be subject to the general requirements for Access BPL systems, since the same system may now be carrying broadband signals as well as monitoring and control signals? How could, or should, these functions be separated?
- What interference issues, if any, besides the issues raised under the general BPL interference section, *supra*, must be addressed with the deployment of high-speed power line carrier systems?

16. *Other Matters.* The questions raised in this Notice of Inquiry are intended to solicit information to assist the Commission in deciding whether to propose rule changes as a result of the developing BPL technology. We realize that these questions do not necessarily encompass all of the possible issues raised by this technology. Parties therefore may wish to comment on the following additional topics:

- What standardized transport and data link protocols are typically used between a user's personal computer, for example, and the Internet point of presence, over Access BPL systems? For example, is Point-to-Point Protocol (PPP), PPP over Ethernet (PPPoE), Asynchronous Transfer Mode (ATM), or other such lower layer protocols involved?

17. We seek information on the subject of communications over electric power lines from all interested parties to obtain a wide representation of viewpoints. Accordingly, we request comments on any other matters or issues, in addition to those discussed previously, that may be pertinent to BPL technology.

Federal Communications Commission.

#### SUPPLEMENTARY INFORMATION:

##### A. Background

In July 1990, the National Security Telecommunications and Information Systems Security Committee (NSTISSC) was established for the purpose of developing and promulgating national policies applicable to the security of national security telecommunications

and information systems. In January 2000, NSTISSC issued Policy No. 11, which addresses the national policy governing the acquisition of information assurance and information assurance-enabled information technology products. Policy No. 11 states that information assurance shall be considered as a requirement for all systems used to enter, process, store, display, or transmit national security information. DoD has issued DoD Directive 8500.1, Information Assurance, and DoD Instruction 8500.2, Information Assurance Implementation, to implement Policy No. 11. This proposed rule makes corresponding changes to DFARS subpart 239.71 and the clause at DFARS 252.239-7000.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

##### B. Regulatory Flexibility Act

DoD does not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the DFARS changes in this rule reflect existing Government policy pertaining to requirements for information assurance in the acquisition of information technology. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subparts in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2002-D020.

##### C. Paperwork Reduction Act

The information collection requirements in the clause at DFARS 252.239-7000 have been approved by the Office of Management and Budget, under Clearance Number 0704-0341, for use through October 31, 2004.

**Michele P. Peterson,**

*Executive Editor, Defense Acquisition Regulations Council.*

Therefore, DoD proposes to amend 48 CFR parts 239 and 252 as follows:

1. The authority citation for 48 CFR parts 239 and 252 continues to read as follows:

**Authority:** 41 U.S.C. 421 and 48 CFR chapter 1.

## PART 239—ACQUISITION OF INFORMATION TECHNOLOGY

2. Subpart 239.71 is revised to read as follows:

#### 239.7102 Definition.

*Information assurance*, as used in this subpart, means measures that protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. This includes providing for the restoration of information systems by incorporating protection, detection, and reaction capabilities.

#### 239.7103 Policy and responsibilities.
