Approval and Promulgation of Air Quality Implementation Plans; West Virginia; Regulation to Prevent and Control Particulate Matter Air Pollution From Manufacturing Processes and Associated Operations**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

SUMMARY: EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the State of West Virginia for the purpose of establishing regulations for the prevention and control of particulate matter air pollution from manufacturing processes and associated operations. In the final rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A more detailed description of the State submittal and EPA's evaluation are included in a Technical Support Document (TSD) prepared in support of this rulemaking action. A copy of the TSD is available, upon request, from the EPA Regional Office listed in the **ADDRESSES** section of this document. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

BILLING CODE 6560-50-P**FEDERAL COMMUNICATIONS COMMISSION****47 CFR Part 2**

[ET Docket No. 03-102 and 99-261; FCC 03-90]

Above 76 GHz**AGENCY:** Federal Communications Commission.**ACTION:** Proposed rule.

SUMMARY: This document seeks comment on reallocate spectrum in the 76-81 GHz frequency and the frequency bands above 95 GHz to make the domestic and international frequency allocation changes consistent with each other. The realignment is consistent with change made at the 2000 World Radiocommunication Conference (WRC-2000). The primary intent of WRC-2000 was to place scientific services, such as Earth-exploration satellite (EESS) and radio astronomy (RAS) services in spectrum better suited to their needs. This document also seeks comment on adopting the limit for maximum power spectral density that can be delivered to a fixed service transmitter antenna set forth in the U.S. proposal to WRC-2000.

DATES: Written comments are due August 4, 2003, and reply comments are due September 2, 2003.
