This Notice also lists the following information:

Title of Proposal: A Study of the Effectiveness of the Milwaukee Lead Hazard Control Ordinance.

OMB Approval Number: 2539-0017.

Form Numbers: None.

Description of the Need for the Information and Its Proposed Use: Despite dramatic reductions in blood-lead levels over the past 15 years, lead poisoning continues to be significant health risk for young children. The Third National Health and Nutrition Examination Survey suggests that the greatest risk exists for children under the age of two. The development of a viable national strategy for the primary prevention of lead poisoning in these young children is a difficult task. The City of Milwaukee has enacted an ordinance requiring owners of pre-1950 rental properties in two target neighborhoods to carry out specified essential maintenance practices and standard treatments by April 30, 2000. The purpose of this information collection activity is to evaluate the feasibility, costs, and effectiveness (in terms of reducing residential dust-lead levels and preventing elevated blood-lead levels in children under two years of age) of the comprehensive primary prevention program being conducted in the two target Milwaukee neighborhoods. The collection information will be used as vital input for developing a viable national strategy for the primary prevention of childhood lead poisoning.

This information collection will involve conducting brief on-site interviews of tenants, conducting visual inspections of rental units, collecting dust-wipe samples for lead analysis from selected floor and window sill locations, and obtaining bold-samples from study subjects. If appropriate, the results of this information collection will be used to improve existing HUD guidance for primary prevention lead-hazard control activities.

Respondents: Individuals or households; State, Local Government.
