

**DEPARTMENT OF ENERGY****Federal Energy Regulatory  
Commission****[Docket No. CP03-305-000]****Distrigas of Massachusetts LLC;  
Notice of Application**

June 2, 2003.

Take notice that on May 22, 2003, Distrigas of Massachusetts LLC (DOMAC), One Liberty Square, 10th Floor, Boston, Massachusetts 02109, filed in Docket No. CP03-305-000, an application pursuant to section 7(c) of the Natural Gas Act and part 157 of the Federal Energy Regulatory Commission's regulations for authorization to construct, install, operate, and maintain facilities (DOMAC Connection) at DOMAC's liquefied natural gas (LNG) plant in Everett, Massachusetts in order to connect to and deliver regasified LNG into the system of Algonquin Gas Transmission Company (Algonquin), as more fully described in the application. This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "FERRIS" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or toll-free at (866)208-3676, or for TTY, contact (202)502-8659.

DOMAC states that its application is related to Algonquin's pending HubLine Phase II (or Everett Extension) proceeding, filed on February 5, 2003, in Docket No. CP01-5-003. DOMAC explains that, in the HubLine Phase II proceeding, Algonquin proposes to construct the Everett Extension, in part, to provide 50,000 Dth/d of firm transportation service for DOMAC, and that the DOMAC Connection facilities are necessary to allow such regasified LNG to be delivered into Algonquin's Everett Extension. DOMAC states that the DOMAC Connection represents a new avenue for the delivery of regasified LNG to the New England gas market, while mitigating take-away constraints on its regasified LNG.

Specifically, DOMAC proposes to construct a new 300-foot send-out line, odorant system, and metering system, and to reconfigure existing vaporization equipment to allow higher pressure deliveries into Algonquin's Everett Extension. The proposed facilities will be built entirely on the LNG plant's

existing property, and will cost approximately \$2.4 million.

DOMAC requests that the Commission issue a final certificate by December 1, 2003, in order to allow DOMAC time to meet its contractual obligation to complete the project by June 1, 2005.

Any questions regarding this application should be directed to Mr. Robert A. Nailling, Vice President and General Counsel, Distrigas of Massachusetts LLC, One Liberty Square, 10th Floor, Boston, Massachusetts 02109, or call (617)526-8300 or FAX (617)526-8356.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.214 or 385.211) and the regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents,

and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project. This preliminary determination typically considers such issues as the need for the project and its economic effect on existing customers of the applicant, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the applicant may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this proposal, it is important either to file comments or to intervene as early in the process as possible.

Protests and interventions may be filed electronically via the internet in lieu of paper; *see* 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. The Commission strongly encourages electronic filings.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

Comment Date: June 23, 2003.

**Magalie R. Salas,**  
Secretary.
