#### II. Description of the Proposal

CBOE proposes to amend CBOE Rule 5.5, Interpretation and Policy .01 to implement the \$1 Strike Pilot Program. The Pilot Program will operate for a one-year period beginning June 5, 2003, and ending on June 5, 2004. The Pilot Program will allow CBOE to list options on selected stocks trading below \$20 at one-point intervals, provided that the strike prices are \$20 or less, but not less than \$3. For an option to be eligible for inclusion in the Pilot Program, the underlying stock must close below \$20 in its primary market on the previous business day. CBOE may select up to five individual stocks to be included in its Pilot Program. In addition, CBOE may list \$1 strike prices in any equity option included in the \$1 strike pilot program of any other options exchange. CBOE will only list \$1 strike prices that fall within a \$5 range of the underlying stock price. CBOE will not list long-term options series ("LEAPS") at \$1 strike price intervals, nor will CBOE list \$1 strike prices at levels that "bracket" existing \$2.50 intervals (e.g., \$7 and \$8 strikes around a \$7.50 strike). As the \$2.50 intervals are phased-out, the Exchange will introduce the \$1 prices that bracket the phased-out prices.

CBOE Rule 5.5, Interpretation and Policy .03 will govern the addition of expiration months for \$1 strike series. Upon expiration of the near-term month, CBOE may list an additional expiration month provided that the underlying stock closes below \$20 on its primary market on expiration Friday. If the underlying stock closes at or above \$20 on expiration Friday, CBOE will not list an additional month for a \$1 strike series until the stock again closes below \$20.

At any time, CBOE may cease listing \$1 strike prices on existing series by submitting a cessation notice to the Options Clearing Corporation ("OCC"). As discussed above, if the underlying stock closes at or above \$20 on expiration Friday, CBOE will not list any additional months with \$1 strike prices until the stock subsequently closes below \$20. If the underlying stock does not subsequently close below \$20, thereby precluding the listing of
