Certain Brake Drums and Rotors From China

ACTION: Institution and scheduling of an investigation under section 421(b) of the Trade Act of 1974 (19 U.S.C. 2451(b)) (the Act).

SUMMARY: Following receipt of a petition, as amended, on June 6, 2003, on behalf of the Coalition for the Preservation of American Brake Drum and Rotor Aftermarket Manufacturers, the Commission instituted investigation No. TA–421–3, Certain Brake Drums and Rotors from China, under section 421(b) of the Act to determine whether certain brake drums and rotors 1 from China are being imported into the United States in such increased quantities or under such conditions as to cause or threaten to cause market disruption to the domestic producers of like or directly competitive products.

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission’s Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 206, subparts A and E (19 CFR part 206).

EFFECTIVE DATE: June 6, 2003.

General information concerning the Commission may also be obtained by accessing its internet server (http://www.usitc.gov). The public record for this investigation may be viewed on the Commission’s electronic docket (EDIS) at http://edis.usitc.gov.

SUPPLEMENTARY INFORMATION:

1 Brake drums and rotors are defined as brake drums and rotors made of gray cast iron, which are either finished, semifinished, or unfinished, ranging in diameter from 8 to 16 inches (20.32 to 40.64 centimeters) and in weight from 8 to 45 pounds (3.63 to 20.41 kilograms). The size parameters (weight and dimension) of the brake drums and rotors limit their use to the following types of motor vehicles: automobiles, all-terrain vehicles, vans and recreational vehicles under “one ton and a half.”

Finished brake drums and rotors are those that are ready for sale and installation without any further operations. Semifinished drums are those on which the surface is not entirely smooth, and has undergone some drilling. Unfinished drums are those which have undergone some grinding or turning.

These brake drums and rotors are for motor vehicles, and do not contain in the casting a logo of an original equipment manufacturer (OEM) which produces vehicles sold in the United States (e.g., General Motors, Ford, DaimlerChrysler, Honda, Toyota, Volvo). Brake drums and rotors covered in this investigation are not certified by OEM producers of vehicles sold in the United States. The scope also includes composite brake drums that are made of gray cast iron, which contain a steel plate, but otherwise meet the above criteria.

The imported products are provided in subheading 8708.39.50 of the Harmonized Tariff Schedule of the United States (HTS). Although the HTS category is provided for convenience and Customs purposes, the written description of the merchandise under investigation is dispositive.
