SUPPLEMENTARY INFORMATION

I. Abstract

In accordance with Executive Order 12862, the National Institute of Standards and Technology (NIST), a nonregulatory agency of the Department of Commerce, proposes to conduct a number of surveys of the U.S. capital facilities industry, a sector of the U.S. construction and facilities management industry. The surveys, to be administered to capital facilities architects, general contractors, engineers, suppliers, software developers, and owner-operators, will be designed to gather quantitative data. This data will be used to calculate the efficiency loss, in dollars, of inadequate electronic interoperability in the capital facilities supply chain and in capital facilities life cycle management. Each aforementioned stakeholder group will be administered a unique survey tailored to their activities in the design, construction, and operation of capital facilities. The surveys will collect data on respondents' capital facilities projects, business processes involving the exchange of electronic and paper-based communication, information technology investments, and the amount of labor involved in managing information flows internally and externally. Respondents will also be offered the opportunity to freely comment on the extent to which interoperability issues impact their businesses and operations. The surveys will be voluntary and confidential. At no time will the data collected be disclosed to any third parties.

II. Method of Collection

NIST will collect this information through an Internet survey housed on a Web site using 128-bit encryption. Respondents will create their own unique user IDs and passwords. If respondents indicate that they are

available for further comment or for clarifying responses, they may be contacted via telephone or e-mail.

The applicant proposes to utilize tangle net methodology combined with observational surveys from boats to study sea turtles in the estuarine systems of Alabama state waters from Grand Bay to Perdido Bay. The purpose of the research is to provide a basic understanding of the abundance, location, and movement of sea turtles within these estuarine ecosystems. This research will help resource managers develop optimal management strategies for these estuaries in order to conserve and protect sea turtles and their habitat. The applicant proposes to take 30 Kemp's ridley, 30 loggerhead, and 30 green sea turtles annually. Turtles would be captured with a 9.9 inch (25 cm) mesh tangle net that is 731.7 feet (223 m) long by 19.7 feet (6 m) deep. Turtles would be measured, weighed, flipper tagged, blood sampled and released. A subset of five loggerhead and five Kemp's ridley sea turtles would be tagged with a sonic or satellite transmitter. The requested duration of this permit is 5 years.

Written comments or requests for a public hearing on this application should be mailed to the Chief, Permits, Conservation and Education Division, F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910.
