**Title:** National Environmental Performance Track Program (OMB Control Number 2010-0032, EPA ICR

Number 1949.02). This is a request to renew an existing approved collection that is scheduled to expire on June 30, 2003. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

**Abstract:** EPA announced the National Environmental Performance Track Program on June 26, 2000. The program is designed to recognize and encourage facilities that consistently meet their legal requirements, that have implemented management systems to monitor and improve performance, that have voluntarily achieved environmental improvements beyond compliance, and that publicly commit to specific environmental improvements and report on progress. Applications submitted by facilities are used by EPA and participating regulatory entities to determine whether the applicant qualifies for the program. A total of 304 facilities are current members of this voluntary program. Environmental Performance Track members are also required to submit an annual performance report documenting their environmental performance relative to the commitments they made upon entry into the program. This information is important to determine whether participants are meeting their commitments, as well as to evaluate the effectiveness of the program. The public reporting elements of the program also provide information to the local community.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 268 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of
