Description: The collections of information in the standard are necessary for implementation of the requirements of the standard. The Standard specifies several paperwork requirements. The following sections describe the information collection requirements and who will use the information.

Paragraph 1910.132(d)(1) requires employers to perform a hazard assessment of the workplace to determine if personal protective equipment (PPE) is necessary. Paragraph (d)(2) requires employers to certify that a hazard assessment has been performed. The signed certification must include the date the hazard assessment was conducted and the identification of the workplace evaluated (area or location).

Paragraph 1910.132 (f)(4) requires employers to certify that employees have received and understood PPE training. The training certification must

include the name of the employee(s) trained, the date of training, and the subject of the certification (i.e., a statement identifying the document as a certification of training in the use of PPE). The hazard assessment assures that the PPE selected is appropriate for the hazards present in the workplace. The certification required with the hazard assessment verifies that the hazard assessment was conducted. The training certification verifies that employees have received the necessary training involving PPE. OSHA compliance officers may require employers to disclose the certification records during an Agency inspection.
