The Division notes that the COOL provisions, which the USDA is charged with implementing and enforcing, require country of origin labeling by specified large retailers of fresh beef (muscle cuts and ground beef).<sup>3</sup> The labeling must identify the country (or countries) of origin in which the cattle was born, raised, and slaughtered. The COOL provisions also define the criteria for a covered commodity such as beef to be labeled as "U.S. Country of Origin." To receive this label, beef must be derived exclusively from animals born, raised, and slaughtered in the United States.<sup>4</sup> The COOL provisions also require any person supplying beef to a retailer to provide information to the retailer indicating the country of origin of the cattle. The provisions further provide USDA with the authority to require persons in the distribution chain to maintain a verifiable recordkeeping audit trail to verify compliance. The USDA must issue final regulations implementing the COOL provisions by September 30, 2004, when the labeling requirement takes effect.

The current capability includes missile launch sites and array of sensors and other test equipment located at the Ronald Reagan Ballistic Missile Test Site (RTS) at Kwajalein Atoll, the Pacific Missile Range Facility (PMRF) in Hawaii, and Vandenberg Air Force Base (AFB) in California.

A Record of Decision will be issued no earlier than 30 days from the date this notice appears in the **Federal Register**.

**DATES:** Consideration will be given to all comments provided on or before August 14, 2003.

**ADDRESSES:** Requests for copies of the document or to provide comments on the FEIS should be addressed to: U.S. Army Space and Missile Defense Command, ATTN: SMDC-EN-V (Mrs. Julia Hudson-Elliott), P.O. **FOR FURTHER INFORMATION CONTACT:**

Please call Mr. Rick Lehner, MDA Director of Communications at (703) 697-8997.

**SUPPLEMENTARY INFORMATION:** The Missile Defense Agency (MDA) and the Federal Aviation Administration (FAA)

(cooperating agency) announced the availability of the Ground-Based Midcourse Defense Extended Test Range Draft Environmental Impact Statement (DEIS) on February 7, 2003 (68 FR 26 6420) providing notice that the DEIS was available for comment. The DEIS public review period was from February 7, 2003 through April 15, 2003. Public hearings were held February 24 through March 6, 2003. Comments from the DEIS review and public hearings have been considered and included along with responses in the FEIS.

The proposed action and alternatives examined in the FEIS include development of the capability for single and dual launches of interceptor and target missiles at the Kodiak Launch Complex (KLC) Alaska, RTS, and/or Vandenberg AFB, with intercepts over the Pacific Ocean. Development of these capabilities would entail construction of two interceptor launchers, one additional target launch pad and construction/alteration of launch support facilities at KLC; target pad modifications at RTS; modification of support facilities at Vandenberg AFB; construction of In-Flight Interceptor Communication System (IFICS) Data Terminals and military and commercial satellite communications in the mid-Pacific and at KLC or Vandenberg AFB; additional range instrumentation (tracking and range safety radars) in the vicinity of sites; and use of either existing Battle Management Command and Control (BMC2) facilities at RTS, or new BMC2 facilities that may be developed at Fort Greely, Alaska and/or Shriever AFB, or Cheyenne Mountain Complex, Colorado, in the validation of the GMD operational concept effort.

Additionally, the proposed action and alternatives include the construction and operation of a Sea-Based Test X-Band Radar (SBX) that would operate in the Pacific broad ocean area and would be home-based in either Alaska, California, Washington, RTS, or Hawaii.
