NUCLEAR REGULATORY COMMISSION

10 CFR Part 72
RIN 3150–AH–20

List of Approved Spent Fuel Storage Casks: NAC–MPC Revision

AGENCY: Nuclear Regulatory Commission.
ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations revising the NAC International, Inc., Multipurpose Canister cask system listing within the “List of Approved Spent Fuel Storage Casks” to include Amendment No. 3 to the Certificate of Compliance (CoC). This amendment would incorporate changes in support of the Yankee Nuclear Power Station (Yankee Rowe) fuel loading campaign and make corrections to the Connecticut Yankee technical specifications. Specifically, the amendment would incorporate fuel enrichment tolerances; incorporate fuel assemblies with up to 20 damaged fuel rods, recaged assemblies, the Yankee Rowe damaged fuel can, and assembly weights up to 432 kilograms (950 pounds); revise the average surface dose rate limits for the concrete cask; incorporate administrative changes in

the American Society of Mechanical Engineers (ASME) Code Alternatives; correct the Connecticut Yankee tables for fuel assembly limits and intact fuel assembly characteristics; and incorporate editorial and administrative changes in the CoC.

Procedural Background

This rule is limited to the changes contained in Amendment 3 to CoC No. 1025 and does not include other aspects of the NAC-MPC cask system design. The NRC is using the "direct final rule procedure" to issue this amendment because it represents a limited and routine change to an existing CoC that is expected to be noncontroversial. Adequate protection of public health and safety continues to be ensured. The direct final rule will become effective on October 1, 2003. However, if the NRC receives significant adverse comments by August 18, 2003, then the NRC will publish a document that withdraws the direct final rule and will subsequently address the comments received in a final rule. The NRC will not initiate a second comment period on this action.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, in a substantive response:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the CoC or technical specifications.

Airworthiness Directives; Air Cruisers Company Emergency Evacuation Slide/Raft System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede an existing airworthiness directive (AD) for a certain Air Cruisers Company Emergency Evacuation Slide/Raft System. That AD currently requires a one-time unpacking and subsequent repacking of the slide/raft systems, identified by basic part number (P/N) with dash numbers, and serial numbers (SNs) listed in the AD, and mandates repacking of all other slide/raft systems of the same design at the next required normal maintenance schedule of the slide/raft system. This proposed AD contains the same requirements but replaces the specific slide/raft system P/N dash numbers with the word "series", reduces the number of affected slide/raft systems to the SNs identified in paragraph (g) of this proposed AD, and eliminates mandating the utilization of the applicable Folding Procedures for subsequent repacking of all slide/raft systems of the same design during the normal scheduled maintenance. This proposed AD is prompted by recent information received that Air Cruisers Company has made modifications which have added new dash numbers to the slide/raft system basic P/N. This has affected some of the SN slide/raft systems listed in the AD. The actions specified in this proposed AD are intended to prevent failure of the slide/raft to properly inflate, which could impede the emergency evacuation of passengers in the event of an airplane emergency.
