NUCLEAR REGULATORY COMMISSION

[Docket No. 030-01295]

Notice of Finding of No Significant Impact and Availability of Environmental Assessment for License Amendment of Materials License No. 06-13022-02; University of Connecticut Health Center, Farmington, CT

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to the University of Connecticut Health Center for Materials License No. 06-13022-02, to authorize release of its facility on the Newington Veterans Administration Campus in Newington, Connecticut for unrestricted use and has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate.

II. EA Summary

The purpose of the proposed action is to allow for the release of the licensee's areas of use within Building No. 5 at the Veterans Administration Medical Center in Newington, Connecticut for

unrestricted use. The University of Connecticut Health Center was authorized by NRC from 1970 to use radioactive materials for research and development purposes at the site. On August 7, 2002, the University of Connecticut Health Center requested that NRC release their facilities in Building No. 5 for unrestricted use. The University of Connecticut Health Center has conducted surveys of the facility and determined that the facility meets the license termination criteria in Subpart E of 10 CFR Part 20.

III. Finding of No Significant Impact

The NRC staff has evaluated the University of Connecticut Health Center's request and the results of the surveys, and has prepared the EA (summarized above) in support of the proposed license amendment to release the University of Connecticut Health Center facility in Newington, Connecticut for unrestricted use. On the basis of the EA, the NRC has concluded that the environmental impacts from the proposed action are not expected to be significant and has determined not to prepare an environmental impact statement for the proposed action. As described in the EA, the NRC staff found no significant impacts based on its review of the adequacy of the radiation release criteria and the adequacy of the final status survey to meet NRC's unrestricted release criteria. In reviewing the amendment request the staff also determined that the environmental impacts were enveloped by the generic analysis performed in support of "Radiological Criteria for License Termination" (62 FR 39058).

IV. Further Information

The EA and the documents related to this proposed action, including the application for the license amendment and supporting documentation, are available for inspection at NRC's Public Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html> (ADAMS Accession Nos. ML031960106, ML022320664, ML022320354). These documents are also available for inspection and copying for a fee at the Region I Office, 475 Allendale Road, King of Prussia, PA 19406. Any questions with respect to this action should be referred to Penny Lanzisera, Nuclear Materials Safety Branch 1, Division of Nuclear Materials Safety, Region I, 475 Allendale Road, King of Prussia, Pennsylvania, 19406; telephone (610) 337-5169; fax (610) 337-5269.

Dated at King of Prussia, Pennsylvania, this 15th day of July, 2003.

For the Nuclear Regulatory Commission.
Pamela J. Henderson,
*Chief Nuclear Materials Safety Branch 1,
 Division of Nuclear Materials Safety, Region I.*

NUCLEAR REGULATORY COMMISSION

Biweekly Notice; Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law 97-415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from, June 27, 2003, through July 10, 2003. The last biweekly notice was published on July 8, 2003 (68 FR 40707).

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration.

Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the Commission's Public Document Room (PDR), located at One White Flint North, Public File Area 01F21, 11555 Rockville Pike (first floor), Rockville, Maryland. The filing of requests for a hearing and petitions for leave to intervene is discussed below.

By August 21, 2003, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and
