Title: NSPS for Wool Fiberglass Insulation Manufacturing Plants (40 CFR Part 60, Subpart PPP) and NESHAP for Wool Fiberglass Manufacturing Plants (40 CFR Part 63, Subpart NNN) (OMB Control Number 2060-0114, EPA ICR Number 1160.07). This is a request to renew an existing approved collection that is scheduled to expire on July 31, 2003. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The Administrator has judged that Particulate Matter (PM) and Hazardous Air Pollutants (HAP) emissions from wool fiberglass manufacturing plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Owners/operators of wool fiberglass manufacturing plants subject to New Source Performance Standards (NSPS) subpart PPP and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) subpart NNN must provide notifications to EPA of construction, modification, startups, shut downs, date and results of initial performance tests and provide semiannual reports of excess emissions. Owners/operators of wool fiberglass manufacturing facilities

subject to NSPS subpart PPP and/or NESHAP subpart NNN must also record continuous measurements of control device operating parameters. For NSPS subpart PPP these operating parameters include gas pressure drop and liquid flow rate if using a wet scrubber and voltage and inlet water flow rates if using an electrostatic precipitator (ESP). For NESHAP subpart NNN operating parameter measurements, include bag leak detection system alarms, furnace operating temperature, glass pull rate, and scrubber and ESP parameter controls.

In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 101 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Wool Fiberglass Manufacturing Plants.

Estimated Number of Respondents: 61.

Frequency of Response: Initial and semiannual.

Estimated Total Annual Hour Burden: 18,216.

Estimated Total Capital and Operations & Maintenance (O & M) Annual Costs: \$488,500 which includes

\$0 annualized capital/startup costs and \$488,500 annual O&M costs.

Changes in the Estimates: There is a decrease of 882 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to all existing sources having already completed required performance testing given that the compliance date of June 14, 2002, has passed.

Dated: July 17, 2003.

Doreen Sterling,

Acting Director, Collection Strategies Division.
