**SUPPLEMENTARY INFORMATION:****I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.* employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)) (PRA-95). This program ensures that information is in the desired format, reporting burden (time and costs) is minimized, collection instruments are understandable, and OSHA's estimate of the information collection burden is correct.

Under § 1910.137(b)(2)(xii), employers must certify that the electrical protective equipment used by their employees passed the tests specified in paragraphs (b)(2)(viii), (b)(2)(ix), and (b)(2)(xi) of the standard. The certification must identify the equipment that passed the tests and the dates of the tests. This provision helps ensure that electrical protective equipment is reliable and safe for employee use and will provide adequate protection against electric shock. In addition, certification helps OSHA to determine if employers are in compliance with the equipment-testing requirements of the standard.
