SUPPLEMENTARY INFORMATION:

Description

The information collection submitted for OMB review contains the following:

1. *Collection of Information:* FERC-585 "Reporting of Electric Energy Shortages and Contingency Plans under PURPA 206."

2. *Sponsor:* Federal Energy Regulatory Commission.

3. Control No. 1902-0138.

The Commission is now requesting that OMB approve a three-year extension of the expiration date, with no changes to the existing collection. The information filed with the Commission is mandatory. Requests for confidential treatment of the information are provided for under Section 388.112 of the Commission's regulations.

1. *Necessity of the Collection of Information:* Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the statutory provisions of Section 206 of the Public Utility Regulatory Policies Act of 1978 (PURPA) (Pub. L. 95-617, 92 Stat. 3117) which amended Section 202 of the Federal Power Act by adding subsection (g). Section 202(g) requires public utilities to report to the Commission, and appropriate State agencies, any unanticipated shortages of electric energy or capacity which would affect the utility's ability to serve its wholesale customers and to report and periodically revise, their contingency plans for such occurrences which would equitably accommodate both retail and wholesale customers.

The Commission uses the contingency plan information to evaluate and formulate appropriate options for action in the event an anticipated shortage is reported or materializes. The Commission also uses this information ensure itself and firm power wholesale customers that both are kept informed about utility contingency plans and anticipated shortages of energy and capacity and to ensure that direct and indirect customers would be treated without undue prejudice or disadvantage during actual shortages.

If the contingency plan data is not provided, the statutory provisions of the FPA and PUPRA will not have been complied with, and information will not be available to assess whether utilities have planned for shortage conditions and/or developed plans with due consideration for equitable customer treatment, as required by the established statute. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR part 294.

5. *Respondent Description:* The respondent universe currently comprises approximately 170 public utilities. In the normal course of a public utility's operations, contingency plans are prepared and usually reviewed and updated periodically. However, the burden on each utility will vary primarily with respect to the number and size of wholesale customers and utility system customers supplied by the reporting utility. The number of respondents is based on the actual number of responses that were received by the Commission since the last OMB submission.

6. *Estimated Burden:* 511 total hours, 7 respondents (average), 1 response per respondent, 73 hours per response (average).

7. *Estimated Cost Burden to respondents:* 511 hours/2080 hours per years × \$117,041 per year = \$28,753.

Statutory Authority: Sections 206 of the Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2601 (Pub. L. 95-617) and Section 202 of the Federal Power Act (16 U.S.C. 824a (g)).

Secretary.
