Regulatory History

This request constitutes the 30-day notice required by OIRA. The Coast Guard has already published [68 FR 22407 (April 28, 2003)] the 60-day notice required by OIRA. That notice elicited two (2) comments. Both comments supported Coast Guard efforts to update the Boating Accident Report (BAR) form and noted the form is well organized and includes greater detail. General comments emphasized the revised BAR form will improve data collection, thus allowing the Coast Guard and other boating safety organizations to better address the causes of boating accidents and fatalities. The Coast Guard provided written responses to comments submitted by the Professional Paddlesports Association and the Ohio Department of Natural Resources in correspondence dated July 22, 2003.

The first comment submitted by the Professional Paddlesports Association (PPA) that was relevant to the BAR form requested the addition of "Canoe/Kayak Touring" in the "Activity at Time of Accident" section of the report form. The Coast Guard concurs and plans to modify the form in the near future.

The Ohio Department of Natural Resources provided a number of comments in regard to the revised BAR

form data elements. Relevant comments are summarized as follows:

Completion of the BAR Form by a Trained Law Enforcement Officer.

The operator of the vessel is required to submit the casualty or accident report to the appropriate reporting authority in compliance with 33 CFR, Part 173, Subpart C—Casualty and Accident Reporting, § 173.55. If the operator cannot submit the report, the owner shall. Professionally trained law enforcement officers and accident investigators file reports for practically all fatal and many serious non-fatal injury accidents.

Revised Wind Speed Categories.

The revised BAR form uses the Beaufort scale to measure wind speed in the marine environment with greater precision. As with the previous BAR form, the revised form retains numeric wind speed categories to enable comparisons across previous years. The Coast Guard concurs with a recommendation to change the lowest speed for the second category to start at one (1) mph instead of zero (0) and plans to modify the revised BAR form in the near future.

Operator Experience, Telephone Numbers, Equipment/Machinery Failure, and Activity at Time of Accident Form Elements

A comment questioned use of the term "Other" and requested space on the form for including additional information for a number of BAR form elements. In response, the Coast Guard includes categories termed "Other" in order to capture unique information that enables analysts to uncover patterns and/or emerging accident trends. The revised BAR form has room to include additional information in the Accident Description section.

Exposure (Boat Use) Information. How Would a Non-owner/Operator Be Able to Provide This Information?

The Coast Guard intends to include exposure questions that will help uncover the estimated number of hours the vessel operator involved in the accident operated the vessel over the past twelve (12) months. The comment offers alternative language for collecting exposure information that the Coast Guard will consider in efforts to capture a national estimate of boat use.

Identification of More Than Two Vessels

In compliance with 33 CFR, Part 173, Subpart C—Casualty and Accident Reporting, § 173.55, the operator of each vessel is required to submit a casualty

or accident report to the appropriate reporting authority. Thus, each vessel operator involved in an accident is required to file a complete accident report form.

Layout of the BAR Form

On page three (3), the operator is not to provide information in the "For Agency Use" section. Pages five and six would not be required for accidents that involve only damage to the vessel and/or personal property. Essentially, pages five and six serve as an addendum and are only used for accidents that involve injuries and/or fatalities.

Instructions Provided Are too Complex in the Accident Description Section For an Operator

In an effort to ensure the privacy of boat operators involved in reported accidents, the Coast Guard is attempting to minimize the amount of personal information provided in the Accident Description section. The Coast Guard also plans to work with State agency personnel responsible for processing accident reports so the information contained in the Accident Description section is entered into an information management system (BARD-Web) in a standard uniform format.

Direction Provided on the Location of the Coast Guard PFD Approval Numbers and the Term "Other" as an Option for Injured Status

The Coast Guard concurs and will revise the BAR form in the near future.

Adding Options for "Racing" and "Cruising/Pleasure Boating" Under Victim Activity

This information is currently captured under the heading "Accident Events and Contributing Factors".

Request for Comments

The Coast Guard invites comments on the proposed collection of information to determine whether the collection is necessary for the proper performance of the functions of the Department. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the collection; (2) the accuracy of the Department's estimated burden of the collection; (3) ways to enhance the quality, utility, and clarity of the information that is the subject of the collection; and (4) ways to minimize the burden of collection on respondents, including the use of automated collection techniques or other forms of information technology.

Comments, to DMS or OIRA, must contain the OMB Control Number of the ICR addressed. Comments to DMS must

contain the docket number of this request, USCG 2003-14928. Comments to OIRA are best assured of having their full effect if OIRA receives them 30 or fewer days after the publication of this request.
