SUPPLEMENTARY INFORMATION:

I. Background

MSHA evaluates and approves explosive materials and blasting units as permissible for use in the mining industry. However, since there are no permissible explosives or blasting units available that have adequate blasting capacity for some metal and nonmetal gassy mines, Standard 57.22606(a) was promulgated to provide procedures for mine operators to follow for the use of non-approved explosive materials and blasting units. Mine operators must notify MSHA in writing, of all non-approved explosive materials and blasting units to be used prior to their use. MSHA evaluates the non-approved explosive materials and determines if they are safe for blasting in a potentially gassy environment.

II. Desired Focus of Comments

MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice, or viewed on the Internet by accessing the MSHA home page (<http://www.msha.gov>) and then choosing "Statutory and Regulatory Information" and **Federal Register Documents**.

III. Current Actions

MSHA uses the information to determine that the explosives and blasting procedures to be used in a gassy underground mine are safe. Federal inspectors use the notification to ensure that safe procedures are followed.
