Title: National Listing of Advisories.

Abstract: The National Listing of Fish and Wildlife Advisories (NLFWA) Database contains information on the number of new advisories issued by each state, territory, or tribe annually. The advisory information collected identifies the waterbody under advisory,

the fish or shellfish species and size ranges included in the advisory, the chemical contaminants and residue levels causing the advisory to be issued, the waterbody type (river, lake, estuary, coastal waters), and the target populations to whom the advisory is directed. This information is collected under the authority of section 104 of the Clean Water Act, which provides for the collection of information to be used to protect human health and the environment. The results of the survey are shared with states, territories, tribes, other federal agencies, and the general public through the NLFWA database and the distribution of annual fish advisories fact sheets. The responses to the survey are voluntary and the information requested is part of the state public record associated with the advisories. No confidential business information is requested. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR. The EPA would like to are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: The annual public reporting burden for the collection of information (averaged over the first three years of the information collection request) is 3,566 labor hours per year. This includes one response per year from 92 respondents with an average of 38.76 hours per response. The total annualized cost to the respondents is estimated at \$529.00. No capital or startup costs are required. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or
