Title: Questionnaire for Nominees for the Annual National Clean Water Act Recognition Awards Program.

Abstract: This ICR requests re-approval to collect data from EPA's National Clean Water Act Recognition Awards nominees. The awards are for the following program categories: Operations and Maintenance (O&M) Excellence, Biosolids (Biosolids) Management Excellence, Combined Sewer Overflow Control (CSO) Program Excellence and Storm Water (SW) Management Excellence.

Note: Information collection approval for the Pretreatment Awards Program is included in the National Pretreatment Program ICR (OMB No. 2040.0009, EPA ICR No. 0002.09), approved through September 30, 2003. The National Clean Water Act Recognition Awards Program is managed by EPA's Office of Wastewater Management (OWM). The Awards Program is authorized under Section 501(e) of the Clean Water Act, as amended. The Awards Program is intended to provide recognition to municipalities and industries which have demonstrated outstanding technological achievements, innovative processes, devices or other outstanding methods in their waste treatment and pollution abatement programs. Approximately 50 awards are presented annually. The achievements of these award winners are summarized in reports, news articles, national publications, and **Federal Register** Notice.

Submission of information on behalf of the respondents is voluntary. No confidential information is requested. The Agency only collects information from award nominees under a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9. Based on the data collection, national panels will evaluate the nominees' efforts and recommend finalists. The collections will be used by the respective awards programs to evaluate and determine which abatement achievements should be recognized. A regulation in the **Federal Register** on February 8, 2002, (67 FR 6138, February 8, 2002) establishes a framework for the annual Clean Water Act Recognition Awards.

As currently structured, the O&M awards category has nine sub-categories which recognize municipal achievements. The biosolids awards category has four sub-categories which recognize municipal biosolids operations, technology and research

achievements, and public acceptance; the CSO awards category has one sub-category which recognizes municipal programs; and the SW awards category has two sub-categories which recognize municipal and industrial programs. All nominees are screened for environmental compliance by the States and EPA. Municipalities and institutions desiring to be considered for National awards voluntarily complete the questionnaires and provide design and operating information about their facility or programs. The award nominations are reviewed by State/Regional officials prior to forwarding them for National award consideration. At the National level, award reviews involve Federal officials and review panels comprised of representatives of EPA, State water pollution control agencies and affiliated associations.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The information is collected from approximately 200 respondents at a total cost of \$89,600 per year and 2800 burden hours, including \$52,200 and 1600 burden hours for the respondents' time, and \$37,400 and 1200 burden hours for the States' review time. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of

information; search data sources; complete and review the collection of information; and transmit or otherwise disclose information.

Dated: August 6, 2003.
