The Debt Collection Improvement Act of 1996 requires that agencies collect taxpayer identification numbers (TINs) from individuals who do business with the Government, including contractors and recipients of credit, licenses, permits, and benefits. The TIN will be used to process all electronic payments (refunds) made to licensees by electronic funds transfer by the Department of the Treasury. The Department of the Treasury will use the TIN to determine whether the refund can be used to administratively offset any delinquent debts reported to the Treasury by other government agencies. In addition, the TIN will be used to collect and report to the Department of the Treasury any delinquent indebtedness arising out of the licensee's or applicant's relationship with the NRC.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-344]

### Environmental Assessment and Finding of No Significant Impact Related to Portland General Electric Company's Request for Partial Exemption From the Recordkeeping Requirements

#### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering granting a partial exemption from the Recordkeeping requirements of Title 10 of the Code of Federal Regulations (10 CFR) 50.71(c); 10 CFR part 50, appendix A; 10 CFR part 50, appendix B, for the Trojan Nuclear Plant (TNP) as requested by Portland General Electric Company (PGE) on July 9, 2003. An environmental assessment (EA) was performed by the NRC staff in support of its review of the exemption request.

#### II. Environmental Assessment

##### Introduction

PGE is the licensee and holder of Facility Operating License No. NPF-1(TNP). On January 27, 1993, PGE notified NRC of its decision to permanently cease power operation at TNP. PGE submitted the Trojan Decommissioning Plan (DP) and a decommissioning environmental report on January 2, 1993, which the NRC approved on December 18, 1995. The licensee began decommissioning shortly after NRC approved the DP. The licensee has removed and successfully shipped the TPN steam generators, pressurizer, and reactor pressure vessel for off-site disposal at the U.S. Ecology low-level radioactive waste disposal facility near Richland, Washington. With removal of these components, the licensee has removed approximately 99 percent of the activity covered under its part 50 license.

##### Purpose and Need for Proposed Action

The requested exemption and application of the exemption will eliminate an unwarranted financial burden on ratepayers associated with the storage of a large volume of hardcopy records.
