4. Does the CARE Act local planning process (e.g., needs assessment, priority setting, and allocation processes) ensure a fair and appropriate opportunity to determine the HIV care and support service needs of your community?
5. What are the most significant HIV service gaps in your community? How can the CARE Act help fill them?
6. What are the most significant barriers to access to services? How can the CARE Act help overcome them?
7. How can the CARE Act respond more fully to the current and changing needs of people living with HIV?
8. What is the single most important thing you would change in the CARE Act and why?
