BILLING CODE 7590–01–P

NUCLEAR REGULATORY

COMMISSION

Agency Information Collection

Activities: Proposed Collection;

Comment Request

AGENCY: U.S. Nuclear Regulatory

Commission (NRC).

ACTION: Notice of pending NRC action to

submit an information collection

request to OMB and solicitation of

public comment.

SUMMARY: The NRC is preparing a

submittal to OMB for review of

continued approval of information

collections under the provisions of

the Paperwork Reduction Act of 1995 (44

Information pertaining to the

requirement to be submitted:

1. The title of the information

collection: 10 CFR Part 50, “Domestic

 Licensing of Production and Utilization

Facilities.”

3. How often the collection is

required: As necessary in order for NRC

to meet its responsibilities to conduct a
detailed review of applications for
licenses and amendments thereto to
construct and operate nuclear power
plants, preliminary or final design
approvals, design certifications, research
and test facilities, reprocessing
plants and other utilization and
production licenses, licensed pursuant
to the Atomic Energy Act of 1954, as
amended (the Act) and to monitor their
activities.

4. Who is required or asked to report:

Licensees and applicants for nuclear
power plants and research and test
facilities.

5. The number of annual respondents:

175.

6. The number of hours needed

annually to complete the requirement or

request: 5.2M: 1.8M hours reporting

(average of 288 hrs/response) + 3.4M

hours recordkeeping (average of 19K

hrs/recordkeeper).

7. Abstract: 10 CFR part 50 of the

NRC’s regulations “Domestic Licensing

of Production and Utilization

Facilities,” specifies technical

information and data to be provided to

the NRC or maintained by applicants

and licensees so that the NRC may take
determinations necessary to protect the

health and safety of the public, in

accordance with the Act. The reporting

and recordkeepings requirements

contained in 10 CFR part 50 are

mandatory for the affected licensees and

applicants.

Submit, by October 28, 2003,

comments that address the following

questions:

1. Is the proposed collection of

information necessary for the NRC to

properly perform its functions? Does the

information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the

quality, utility, and clarity of the

information to be collected?

4. How can the burden of the

information collection be minimized,

including the use of automated

collection techniques or other forms of

information technology?

A copy of the draft supporting

statement may be viewed free of charge

at the NRC Public Document Room, One

White Flint North, 11555 Rockville

Pike, Room O–1 F23, Rockville, MD

20852. OMB clearance requests are

available at the NRC worldwide Web

site: http://www.nrc.gov/public-involve/

doc-comment/omb/index.html. The

document will be available on the NRC

home page site for 60 days after the

signature date of this notice.

Comments and questions about

the information collection requirements

may be directed to the NRC Clearance

Officer, Brenda Jo. Shelton, U.S. Nuclear

Regulatory Commission, T–5 C3,

Washington, DC 20555–0001, by
telephone at 301–415–7233, or by

Internet electronic mail at

Infocollects@nrc.gov.

Dated at Rockville, Maryland, this 22nd
day of August 2003.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of the Chief

Information Officer.

BILLING CODE 4510–21–M

Environmental Assessment

Identification of the Proposed Action:

The proposed action would revise the

Turkey Point, Units 3 and 4, FOLs and

Technical Specifications (TSs) to

correct, update, and reorder the TS

Index, reformat TS equations with more

appropriate mathematical symbols,
delete irrelevant information, correct an

error in the titling of a figure, correct

ACTION and APPLICABILITY

statements to improve consistency and

readability, and would enhance,

through administrative means, the

overall clarity of the TSs.

The proposed action is in accordance

with the licensee’s application dated

December 20, 2002, as supplemented in

The Need for the Proposed Action:

The proposed action is needed in order

to achieve consistency with previously

approved TS amendments, and other

parts of the existing TSs through

administrative changes.

Environmental Impacts of the

Proposed Action: The NRC has

completed its evaluation of the

Florida Power and Light, Turkey Point

Units 3 and 4: Environmental

Assessment and Finding of No

Significant Impact

The U.S. Nuclear Regulatory

Commission (NRC) is considering

issuance of amendments to Facility

Operating License (FOL) Nos. DPR–31

and DPR–41, issued to Florida Power

and Light Company (the licensee), for

operation of the Turkey Point Nuclear

Plant Units 3 and 4, located in Miami-

Dade County, Florida. Therefore,
pursuant to Title 10 of the Code of

Federal Regulations (10 CFR) part 50,

section 51.21, the NRC is issuing this

environmental assessment and finding of

no significant impact.

Environmental Assessment

Identification of the Proposed Action:

The proposed action would revise the

Turkey Point, Units 3 and 4, FOLs and

Technical Specifications (TSs) to

correct, update, and reorder the TS

Index, reformat TS equations with more

appropriate mathematical symbols,
delete irrelevant information, correct an

error in the titling of a figure, correct

ACTION and APPLICABILITY

statements to improve consistency and

readability, and would enhance,

through administrative means, the

overall clarity of the TSs.

The proposed action is in accordance

with the licensee’s application dated

December 20, 2002, as supplemented in

The Need for the Proposed Action:

The proposed action is needed in order

to achieve consistency with previously

approved TS amendments, and other

parts of the existing TSs through

administrative changes.

Environmental Impacts of the

Proposed Action: The NRC has

completed its evaluation of the
proposed action and concludes that the proposed license amendment and associated changes to the TSs are administrative in nature and have no effect on the physical aspect or operation of components or structures within the restricted area as defined in 10 CFR part 20.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types or amounts of any effluents that may be released offsite, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect nonradiological plant effluents and has no other environmental impacts. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

**Environmental Impacts of the Alternatives to the Proposed Action:** As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the “no-action” alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

**Alternative Use of Resources:** The action does not involve the use of any different resource than those previously considered in the Final Environmental Statement for the Turkey Point Nuclear Plant, Units 3 and 4, dated July 1972.

**Agencies and Persons Consulted:** Based upon a letter dated March 8, 1991, from Ms. Mary E. Clark of the State of Florida, Department of Health and Rehabilitative Services, to Ms. Deborah A. Miller, Licensing Assistant, NRC, the State of Florida does not desire notification of issuance of license amendments.

**Finding of No Significant Impact**

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee’s letter dated December 20, 2002. Documents may be examined, and/or copied for a fee, at the NRC’s Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, http://www.nrc.gov/reading-rm/adams.html. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1–800–397–4209 or 301–415–4737, or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 25th day of August 2003.

For the Nuclear Regulatory Commission.

Eva A. Brown, Project Manager, Section 2, Project Directorate II, Division of Licensing Project Management, Nuclear Regulation Reactor.

**BILLING CODE 7590–01–P**

**NUCLEAR REGULATORY COMMISSION**

**NUREG/CR–6595, Revision 1, An Approach for Estimating the Frequencies of Various Containment Failure Modes and Bypass Events, Draft Report for Comment**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Announcement of issuance for public comment, availability.

**SUMMARY:** The Nuclear Regulatory Commission has issued for public comment a document entitled: NUREG/CR–6595 Revision 1, “An Approach for Estimating the Frequencies of Various Containment Failure Modes and Bypass Events, Draft Report for Comment”.

**DATES:** Please submit comments by October 31, 2003. Comments received after this date will be considered if it is practical to do so, but the NRC staff is able to ensure consideration only for comments received on or before this date.

**ADDRESSES:** NUREG/CR–6595 Revision 1, “An Approach for Estimating the Frequencies of Various Containment Failure Modes and Bypass Events, Draft Report for Comment” is available for inspection and copying for a fee at the NRC Public Document Room, Public File Area O1–F21, 11555 Rockville Pike, Rockville, Maryland. Publicly available documents created or received at the NRC after November 1, 1999, are available electronically at the NRC’s Electronic Reading Room at http://www.nrc.gov/reading-rm/adams.html. From this site, the public can gain entry into the NRC’s Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC’s public documents. The ADAMS Accession Number for NUREG/CR–6595, Revision 1 is ML032330225. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1–800–397–4209, 301–415–4737 or by e-mail to pdr@nrc.gov.

Please submit comments to Chief, Rules and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. You may also deliver comments to 11545 Rockville Pike, Rockville, Maryland, between 7:30 a.m. and 4:30 p.m. Federal workdays, or e-mail to: NRCREP@nrc.gov.
