

Refuge is comprised of prairie grasslands, ponderosa pine forest, pinon-juniper woodlands, steep canyons, lakes and ponds, small disjointed patches of riparian areas and irrigated lands. Management efforts focus on enhancing and restoring native grassland, riparian and wetland communities for migratory birds, fish and other wildlife species.

The Draft CCP/EA addresses a range of topics including habitat and wildlife management, public use opportunities, land acquisition, invasive species control, and administration and staffing for the Refuge. The key refuge issues and how they are addressed in the plan alternatives are summarized below. Alternative A is the current management, or what is currently offered at the Refuge. Alternative B is the proposed action. Alternative C would call for no active management on the Refuge.

Improvements to public use facilities: Alternative A: The public use program would remain at current levels and no new facilities would be developed on the Refuge. Alternative B: The public use program would increase and/or enhance educational and outreach activities, recreational opportunities, community involvement, and improve facilities. Alternative C: The public use program would be discontinued.

Refuge Land and Boundary Protection: Alternative A: There would be no acquisition of in holdings and, no exploration of possible refuge boundary expansion. Alternative B: The Service would actively pursue acquisition of in holdings under existing authorities and policies from willing sellers. The Service would begin discussions with adjacent land owners regarding habitat conservation partnership opportunities to cooperatively enhance or protect wildlife habitats through agreements. The refuge would consider (*in concept only*) future purchase of fee simple and less than fee simple interest in lands adjacent the refuge from willing sellers only. Any purchase of interest in lands would be subject to additional NEPA compliance and other policy considerations. Alternative C: Same as Alternative A.

Water management activities: Alternative A: Improvements to the water delivery system would remain secondary to other immediate management needs on the Refuge. Alternative B: Improvements to water management activities would be accomplished. Costs would be spread over a long period of time and to the degree possible shared through the development of partnerships and in-

kind efforts. Alternative C: There would be no water delivery improvements.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR part 210—Forms and Reports and part 206—Product Valuation (Form MMS-2014, Report of Sales and Royalty Remittance).

OMB Control Number: 1010-0140.
Bureau Form Number: Form MMS-2014.

Abstract: The Department of the Interior (DOI) is responsible for matters relevant to mineral resource development on Federal and Indian lands and the Outer Continental Shelf (OCS). The Secretary of the Interior (Secretary) under The Mineral Leasing Act (30 U.S.C. 1923) and The Outer Continental Shelf Lands Act (43 U.S.C. 1353) is responsible for managing the production of minerals from Federal and Indian lands and the OCS, collecting royalties from lessees who produce minerals, and distributing the funds collected in accordance with applicable laws. The Secretary has an Indian trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. MMS performs the royalty management functions and assists the Secretary in carrying out DOI’s Indian trust responsibility.

The Federal Oil and Gas Royalty Management Act (FOGRMA) of 1982, 30 U.S.C. 1701 *et seq.*, states in Section 101(a) that the Secretary “* * * shall establish a comprehensive inspection, collection, and fiscal and production

accounting and auditing system to provide the capability to accurately determine oil and gas royalties, interest, fines, penalties, fees, deposits, and other payments owed, and collect and account for such amounts in a timely manner.” The persons or entities described at 30 U.S.C. 1713 are required to make reports and provide reasonable information as defined by the Secretary.

Form MMS–2014, Report of Sales and Royalty Remittance, is the only document used for reporting oil and gas royalties, certain rents, and other lease-related transactions to MMS (e.g., transportation and processing allowances, lease adjustments, and quality and location differentials).

MMS is requesting OMB’s approval to continue to collect this information. Not collecting this information would limit the Secretary’s ability to discharge his/her duties and may also result in loss of royalty payments. Proprietary information submitted is protected, and there are no questions of a sensitive nature included in this information collection.

We have also changed the title of this ICR from “Report of Sales and Royalty Remittance” to “30 CFR part 210—Forms and Reports and part 206—Product Valuation (Form MMS–2014, Report of Sales and Royalty Remittance)” to clarify the regulatory

language we are covering under 30 CFR parts 210 and 206.
