SUPPLEMENTARY INFORMATION:

I. Background

On April 18, 2003, the Research and Special Programs Administration (RSPA; we) published a final rule (68 FR 19258) that revised requirements in the Hazardous Materials Regulations (HMR; 49 CFR parts 171-180) for cargo tank design, qualification, maintenance, and use. Specifically, the final rule:

- Revised the definitions of "Design Certifying Engineer" and "Registered Inspector" to allow experienced persons without degrees to qualify;
 - Permitted cargo tank owners to recertify cargo tanks to their original specifications;
 - Revised minimum road clearance and bottom damage protection requirements for certain cargo tank motor vehicles;
 - Clarified current requirements for using the EPA Method 27 leakage test as an alternative to the HMR leak test requirements;
 - Revised certain requirements applicable to MC 331 and MC 338 cargo tanks for consistency with regulations applicable to the more recently adopted MC 400 series cargo tanks;
 - Required MC 338 cargo tanks to be equipped with a means of thermal activation for automatically closing the internal self-closing stop valve in the event of a fire;
 - Clarified cargo tank test and inspection requirements and relaxes the leakage test requirement for cargo tanks in anhydrous ammonia service; and
 - Eliminated redundant or unnecessary regulations.
- In addition, the April 18 final rule revised the HMR to address three recommendations from the National Transportation Safety Board (NTSB):
- Consistent with Recommendation H-90-91, the April 18 final rule
