Medicare Program; Changes to the Hospital Inpatient Prospective Payment Systems and Fiscal Year 2004 Rates; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Correction of final rule.

SUMMARY: This document corrects technical errors that appeared in the final rule published in the **Federal Register** on August 1, 2003 entitled "Medicare Program; Changes to the Hospital Inpatient Prospective Payment Systems and Fiscal Year 2004 Rates." These corrections include—(1) An error in the assignment of procedures to diagnosis-related group (DRG) 525, Heart Assist System Implant; (2) a technical error in the new technology add-on payment amount for InFUSE™ Bone Graft/LT-CAGE™ Lumbar Tapered Fusion Device (InFUSE™); and (3) technical errors in the wage index values and geographic reclassifications. As a result of the wage index and geographic reclassification corrections, we have recalculated the budget neutrality factors applicable to the operating national average standardized amounts and the capital Federal rate, which resulted in changes to the standardized amounts themselves.

EFFECTIVE DATES: The corrections listed in this document are effective on October 1, 2003.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 03-19363 of August 1, 2003 (68 FR 45346), there was a factual error and a number of technical errors that are identified and corrected in the Correction of Errors section (section II) of this document. There are also typographical errors that are identified and corrected in section II of this document.

We are correcting the assignment of procedures to DRG 525 in light of the much lower charges associated with code 37.62. We are also correcting a factual error in our response to a comment we received stating that the

DRG assignment of International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) procedure codes to DRG 525 is clinically and financially inappropriate. Our response stated that this point had not been raised prior to this year's proposed rule. However, our response was incorrect. In fact, a commenter did point out in response to our proposal to create DRG 525 for FY 2003 that ICD-9-CM procedure code 37.62 was clinically and financially dissimilar to other procedures in DRG 525, and recommended this procedure code not be included in DRG 525 but should remain in DRGs 104 and 105, Cardiac Valve and Other Major Cardiothoracic Procedures With and Without Cardiac Catheterization. (See the August 1, 2002 **Federal Register** (68 FR 49991) for the detailed discussion of the comment and our response.)

We will remove all cases with code 37.62 from DRG 525, and reassign them to DRGs 104 and 105, respectively. Procedure codes 37.63 (Replacement and repair of heart assist system), 37.65 (Implant of an external, pulsatile heart assist system), and 37.66 (Implant of an implantable, pulsatile heart assist system) will continue to be assigned to DRG 525. This change will increase the relative weight and the payments for cases assigned to DRG 525. We now believe this correction is necessary to ensure adequate access to procedures in this DRG. As a result of these corrections, we are also making corrections to the relative weights and the geometric and arithmetic mean length of stay listed in Table 5 of the final rule. Although this change will be effective for discharges occurring on or after October 1, 2003, it requires the issuance of revised GROUPER software. At this time, we do not anticipate revised GROUPER software will be available until at least January 1, 2004. Affected claims may be resubmitted for adjusted payments after that date.

One of the technical errors involved our discussion of the approval of InFUSE™ Bone Graft/LT-CAGE™ Lumbar Tapered Fusion Device (InFUSE™) as a new technology eligible add-on payment. In that discussion, we mistakenly indicated that a single level fusion required the use of two InFUSE products, with a total cost of \$17,800. Based on further review of the costs associated with this technology, we have determined that only one InFUSE product is required for a single level fusion. Accordingly, we are correcting the maximum add-on payment for a case involving the InFUSE™ to be \$4,450. In addition, we have recomputed the budget neutrality

adjustment factor under section 1886(d)(4)(C)(iii) to reflect the lower estimate of the total add-on payments for this new technology.

The technical errors also included several errors in the calculation of the wage index. These errors were due to the mishandling or miscalculation of data by CMS and the fiscal intermediaries. Therefore, we are making corrections to some of the average hourly wages shown in Table 2 for individual hospitals and to the corresponding average hourly wages shown in Table 3A of the Metropolitan Statistical Areas (MSA) where those hospitals are located. At least one of the computational errors also has a spill-over effect on hospitals other than the hospitals that were the subjects of the error. This error involved a few hospitals whose wage indexes were calculated as if their cost reporting periods equaled 1 month (even though the hospitals had reported a full 12 months of data). As we explained in the August 1, 2003 final rule, we annualize short cost-reporting periods to reflect a 1-year period (68 FR 45399). Annualization is accomplished by dividing the data by the number of days in the cost report and then multiplying the results by 365, and such annualization resulted in a wage index for the subject hospitals inflated by a factor of approximately 12. Correcting the error results in a decrease to the national average hourly wage rate and a concurrent general increase in the wage indexes. Consequently, we are republishing Tables 4A through 4H, reflecting corrections to hospitals' wage indexes.

After the publication of the August 1, 2003 final rule, we were notified of a wage index data error for rural Georgia. These errors appear in the average hourly wages listed in Table 2 and in the Table 3B (Wage Index and Capital Geographic Adjustment Factor (GAF) for Rural Areas). The errors in the average hourly wage were a result of the use of an incorrect data file. In this notice, we are correcting the average hourly wage listed in Tables 2 and 3B. However, because we did not receive notification regarding the error in enough time to make corrections to the rural Georgia wage index effective for discharges on or after October 1, 2003, we are not correcting the corresponding wage index values (which are listed in Tables 4B and 4H) in this document. These corrections will be issued in a future program memorandum and made effective prospectively with discharges occurring on or after January 1, 2004.

Also, there were technical errors in the geographic reclassifications that will

result in corrections to the reclassification data displayed in Table 9 of the August 1, 2003 final rule. We note that wage index changes and geographic reclassifications are required to be budget neutral under sections 1886(d)(3)(E) and 1886(d)(8)(D) of the Social Security Act (the Act). Similarly, section 412.308(c)(4) of the regulations requires that the capital standard Federal rate be adjusted so that the annual DRG reclassification and the recalibration of DRG weights and changes in the geographic adjustment factor (GAF) are budget neutral. Therefore, in order to comply with the statutory and regulatory requirements for overall budget neutrality, we recalculated the budget neutrality factors applied to operating national average standardized amounts and the capital Federal rate. Because the wage indexes generally increased across all hospitals, the budget neutrality calculations caused the standardized amounts to decrease slightly. We have also corrected the relevant columns of Table I from the impact analysis in Appendix A to reflect these corrections to the wage index and standardized amounts. In addition, we are correcting a typographical error in the same table. We note that this correction is essentially nullified by the wage index corrections. However, we want to point out the value of the published figure should have been positive rather than negative (*see* correction to page 45662). Finally, we note that total payments to hospitals under IPPS are relatively unaffected by changes in prospective payments for capital-related costs. Since capital PPS payments constitute about 10 percent of hospital payments, a 1-percent change in the capital Federal rate yields only about 0.1 percent change in actual payments to hospitals. Thus, the impact of the -0.31 percent change in the FY 2004 capital Federal rate is negligible.

Lastly, we are republishing Table 10, Mean and .75 Standard Deviation by Diagnosis-Related Group in its entirety, due to the inadvertent publication of the incorrect version of Table 10 in the final rule.

Under § 412.88(a)(2), new technology add-on payments are limited to the lesser of 50 percent of the average cost of the device or 50 percent of the costs in excess of the DRG payment for the case. As a result, the maximum add-on payment for a case involving the InFUSE™ is \$8,900.” are corrected to read “The average cost of the InFUSE™ is reported to be \$8,900 for a single level fusion. b. Upper half of the page, the table entitled Comparison of Factors and Adjustments: FY 2003 Capital Federal Rate and FY 2004 Capital Federal Rate, the table is corrected to read as follows:

	FY 2003	FY 2004	Change	Percent change
Update factor ¹	1.0110	1.0070	1.0070	0.70
GAF/DRG Adjustment Factor ¹	0.9957	1.0026	1.0026	0.26
Outlier Adjustment Factor ²	0.9469	0.9523	1.0057	0.57
Exceptions Adjustment Factor ²	0.9970	0.9995	1.0025	0.25
Capital Federal Rate	\$406.93	\$414.18	³ 1.0178	³ 1.78

¹ The update factor and the GAF/DRG budget neutrality factors are built permanently into the capital rates. Thus, for example, the incremental change from FY 2003 to FY 2004 resulting from the application of the 1.0026 GAF/DRG budget neutrality factor for FY 2004 is 1.0026.

² The outlier reduction factor and the exceptions adjustment factor are not built permanently into the capital rates; that is, these factors are not applied cumulatively in determining the capital rates. Thus, for example, the net change resulting from the application of the FY 2004 outlier adjustment factor is 0.9523/0.9469, or 1.0057.

³ The percent change in factors and adjustments may not sum due to rounding.

c. Lower half of the page, the table entitled Comparison of Factors and

Adjustments: FY 2004 Proposed Capital Federal Rate and FY 2004 Final Capital

Federal Rate, the following entries are corrected to read as follows:

	Proposed FY 2004	Final FY 2004	Change	Percent change
GAF/DRG Adjustment Factor	1.0038	1.0026	0.9988	-0.12

Capital Federal Rate	\$411.72	\$414.18	1.0060	0.60

⁴This column displays the impact of updating the wage index with wage data from hospitals' FY 2000 cost reports.

¹⁰This column shows changes in payments from FY 2003 to FY 2004. It incorporates all of the changes displayed in columns 2, 3, and 8 of the final rule (the changes displayed in columns 4, 5, and 6 are included in column 8). It also reflects the impact of the FY 2004 update, changes in hospitals' reclassification status in FY 2004 compared to FY 2003, and the difference in outlier payments from FY 2003 to FY 2004. The sum of these impacts may be different from the percentage changes shown here due to rounding and interactive effect.

48. On page 45662, in Table I—Impact Analysis of Final Changes for FY 2004 Operating Prospective Payment System (Percent of Changes in Payments per Case), line 39 (All Reclassified Hospitals—Standardized Amount Only), column 10 the figure “-4.6” is corrected to read “4.6”.

49. On page 45664, bottom half of the page,

a. First column, second full paragraph, line 13, the figure “1.005522” is corrected to read “1.002588”.

b. Second column, second full paragraph, lines 8 and 9, the figure “\$ 4.4 million” is corrected to read “2.2 million”; and

c. Third column, first partial paragraph, line 1, the figure “1.005522” is corrected to read “1.002588”.

50. On page 45670, first column, first paragraph, fourth bulleted item,

a. Line 4, the figure “1.0059” is corrected to read “1.0026”; and

b. Line 5, the figure “0.9522” is corrected to read “0.9523”.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** to provide a period for public comment before the provisions of a document take effect. However, we can waive this procedure, if we find good cause that notice and comment procedure is impracticable, unnecessary, or contrary to the public interest and incorporate a statement of the finding and the reasons for it into the notice issued. We can also waive the 30-day delayed effective date of the Administrative Procedure Act (5 U.S.C. 553(d)) when there is good cause to do so and we publish in the rule an explanation of our good cause.

In this document, we are correcting an error related to our discussion of DRG 525, and the assignment of procedure code 37.62. In light of the much lower

charges associated with code 37.62, we are removing all cases with code 37.62 from DRG 525 and reassigning them to DRGs 104 and 105. This correction is necessary to ensure adequate payment for this procedure and for the other procedures that will continue to be assigned to DRG 525. Especially because these are frequently life-saving procedures, it is important that the Medicare payment amount better reflect hospitals' true costs in performing these procedures. We are concerned that, without this correction, payments for the other procedures in DRG 525, particularly procedure code 37.66, will be inadequate. As a result, Medicare beneficiaries' access to these important procedures could be limited. Accordingly, we believe there is a compelling public interest to waive notice and comment rulemaking, as well as the 30-day delay in effective date, for this correction.

We also find it unnecessary to undertake notice and comment rulemaking with respect to the other corrections contained in this document because the remainder of this document merely provides technical corrections to the final rule. We are merely correcting computational or technical errors and making a variety of typographical and grammatical corrections. We are not making changes to payment methodology or payment policy. For example, our changes to the hospital wage index and budget neutrality factor are based upon computational methodologies for which we previously provided notice and received comments. By correcting these data we are not announcing new computational methodologies, but merely ensuring that the data used in the calculations are correct. Similarly, our changes to the add-on payment for InFUSE merely incorporate the correct data into our previously published methodologies for calculating add-on payments. Thus, because the public has already had the

opportunity to comment on the payment methodology used in IPPS, additional comment would be unnecessary.

In addition, we believe it is impracticable at this point in time to solicit additional comments or to delay the effective date of these corrections beyond October 1, 2003. The Social Security Act, in section 1886(d)(3), requires a national adjusted DRG prospective payment rate to be in place at the beginning of the fiscal year. Because the fiscal year begins on October 1, 2003, it is imperative that we ensure that the correct rates are in place by October 1, 2003, and it would not have been possible to publish a notice and receive comments on it in the brief period of time between discovering our errors and the October 1, 2003 effective date for the updated IPPS rates.

Finally, we believe that engaging in notice and comment prior to making these corrections or delaying the effective date beyond October 1, 2003 would be contrary to the public interest. As a matter of good public policy, the rates used in the IPPS should not be based on miscalculations or inappropriate data. The public interest is served by ensuring that the rates used in the IPPS are correct. Thus, it would be contrary to the public interest to delay implementing such corrected rates in order either to engage in notice and comment rulemaking or to provide for a 30-day delay in effective date. Therefore, we find good cause to waive notice and comment procedures, as well as the 30-day delay in effective date.
