Use of Alternative Analytical Test Methods in the Reformulated Gasoline, Anti-Dumping, and Tier 2 Gasoline Sulfur Control Programs

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA proposes to allow the use of certain alternative analytical test methods for measuring sulfur in gasoline and butane under the Federal reformulated gasoline (RFG) and anti-dumping program and the Federal gasoline sulfur control program. We also propose to allow refineries to use any reasonable test method designed for measuring the sulfur content of butane until January 1, 2004. After that date, either the designated analytical test method or an allowed alternative analytical test method would have to be used. The purpose of today's proposal is to grant temporary flexibility until we issue a comprehensive performance-based analytical test methods rule and to fulfill the terms of a recent settlement agreement related to gasoline sulfur test methods.
