

the fundamental basis for paying these air carriers on a timely basis. Typically, subsidized air carriers are small businesses and operate only aircraft of limited size over a limited geographical area. The collection permits subsidized air carriers to submit their monthly claims in a concise, orderly, easy-to-process form, without having to devise their own means of submitting support for these claims.

The collection involved here requests only information concerning the subsidy-eligible flights (which generally constitute only a small percentage of the carriers' total operations) of a small number of air carriers. The collection permits the Department to timely pay air carriers for providing essential air service to certain eligible communities that would not otherwise receive scheduled passenger air service.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper functioning of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
