

potential hazards of the catalyst, that they often advise users to treat the spent catalyst to remove the potential hazard, and that Pfizer's own material safety data sheet (MSDS) indicated that Pfizer considered the material to pose a potential hazard. Given these circumstances, I believe it is totally appropriate for the Region to obtain and consider test information that illustrates the properties of the waste along with other information in determining whether or not this material meets one or more of the narrative standards of the hazardous characteristics.

Much of the information discussed in the preamble to the Petroleum Refinery Rule can be used by waste generators and others to classify spent catalyst appropriately. The Agency also believes that some of the types of information suggested as useful by the Scherger Report are in fact relevant and appropriate to use in this regard. Specifically, the following types of information are relevant and appropriate to use in understanding the properties of spent catalyst for applying the narrative hazardous characteristics definitions at 40 CFR 261.21 and 261.23 to this waste:

- Landfill or other fires attributable to spent catalyst disposal
- Observation of spent catalyst emitting smoke during any phase of waste management
- Transport of spent catalyst with a DOT designation as a pyrophoric or self-heating material, or packaged as required by DOT for materials with this designation
- Failing the DOT test for self-heating material (49 CFR 173.125)
- Information from catalyst new-product MSDS (Material Safety Data Sheet)
- Storage of spent catalyst in special containers or under inert gas such as nitrogen
- Any other management practice intended to, or with no reasonable purpose other than to, limit exposure of waste spent catalyst to the air, such as coating with oil or wetting with water.

Only the first of these waste properties listed above, *landfill or other fires attributable to spent catalyst disposal*, would be sufficient by itself for definitive classification of spent catalyst as an ignitable hazardous waste under 40 CFR 261.21(a)(2). Prevention of landfill fires was one of the underlying reasons for developing an ignitability hazardous characteristic for waste (see *Background Document for the Characteristic of Ignitability*, May 2, 1980, p. 3). Waste generators and others should use the other types of information collectively to make an

appropriate determination regarding the ignitable/reactive properties of spent catalysts. Testing data alone are not sufficient to determine waste status (because the Agency has established no such tests to date³), but the DOT test may be useful in understanding the properties of the waste. The special handling described in this list is relevant because the Agency assumes that waste generators and transporters would not incur the extra cost of special shipping containers or handling and shipping under inert gas absent the need for these measures to ensure the safety of those workers handling the materials. Given what the Agency knows about the potential hazardous properties of spent catalysts, the Agency presumes that any particular spent catalyst managed under these special conditions would very likely pose significant hazards were it managed as non-ignitable waste. RCRA requires the Agency to regulate as hazardous those wastes which may pose a substantial hazard to human health or the environment when improperly managed. The special management of spent catalyst clearly leads to the conclusion that "normal" management of the waste, e.g., in contact with ambient air, poses hazards that RCRA was intended to control by designation of the waste as hazardous.

Disposal of waste spent catalyst that is D001 or D003 hazardous (as determined using the types of information described in the previous paragraphs), which is not decharacterized before disposal, would violate RCRA and its regulations. This may be of particular concern for spent catalyst being sent to a landfill not permitted to manage D001 or D003 wastes.

The Agency solicits from the public any comment on the supporting documentation provided by the petitioner regarding ongoing mismanagement of spent catalyst waste. The Agency also solicits any additional documentary information (as described above) relevant to the potential mismanagement of ignitable spent catalyst that has occurred subsequent to the effective date of the listing determination (February 8, 1999).

What Can You Do To Respond to This NODA?

EPA is seeking comment on the data presented in the VPRA petition regarding PAH concentrations contained in the K172 samples. In particular, we

³The Agency is currently in the process of deleting from SW-846 the 1985 guidance for evaluating waste for sulfide/cyanide reactivity, which was withdrawn from use in 1998.

are interested in whether there are other data available on typical concentrations of PAHs in K172 (spent hydrorefining catalysts). In order for any data you submit to be considered by us in making a determination, the data should be collected, transported, and analyzed under the proper quality assurance and quality control protocols as described at <http://www.epa.gov/quality/>. In addition, process information such as a simplified process diagram and the type of feed for the hydroprocessing reactor from which the sample was collected should be provided to verify the sample represents a K172 spent catalyst. We are also seeking comment on the guidance provided in this notice to aid in the identification of D001 ignitable solids.

What Are the Potential Outcomes of This NODA?

The potential outcomes based on the comments and/or data received under this NODA include a proposed rulemaking to revise the numerical LDR treatment standards for K172, and/or to revise technology-based standards for the self-heating properties of K171 and K172. Also, a potential outcome of this NODA is additional clarification for identifying D001 ignitable solids.

Dated: September 30, 2003.

Matt Hale,

Acting Director, Office of Solid Waste.

BILLING CODE 6560-50-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the

proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 13, 2003.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166-2034:

1. *Freedom Bancshares of Southern Missouri, Inc.*, Cassville, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Freedom Bank of Southern Missouri, Cassville, Missouri.

Board of Governors of the Federal Reserve System, October 14, 2003.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210-01-S

FEDERAL RESERVE SYSTEM

Sunshine Act Notice

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 10 a.m., Wednesday, October 22, 2003.

PLACE: Marriner S. Eccles Federal Reserve Board Building, 20th Street entrance between Constitution Avenue and C Streets, NW., Washington, DC 20551.

STATUS: Open.

We ask that you notify us in advance if you plan to attend the open meeting and provide your name, date of birth, and social security number (SSN) or passport number. You may provide this information by calling (202) 452-2474 or you may *register on-line*. You may pre-register until close of business October 21, 2003. You also will be asked to provide identifying information, including a photo ID, before being admitted to the Board meeting. The Public Affairs Office must approve the use of cameras; please call (202) 452-2955 for further information.

Privacy Act Notice: Providing the information requested is voluntary;

however, failure to provide your name, date of birth, and social security number or passport number may result in denial of entry to the Federal Reserve Board. This information is solicited pursuant to Sections 10 and 11 of the Federal Reserve Act and will be used to facilitate a search of law enforcement databases to confirm that no threat is posed to Board employees or property. It may be disclosed to other persons to evaluate a potential threat. The information also may be provided to law enforcement agencies, courts and others, but only to the extent necessary to investigate or prosecute a violation of law.

MATTERS TO BE CONSIDERED:

Summary Agenda: Because of its routine nature, no discussion of the following item is anticipated. The matter will be voted on without discussion unless a member of the Board requests that the item be moved to the discussion agenda.

1. Proposed 2004 Private Sector Adjustment Factor.

Discussion Agenda

2. Proposed revisions to the method for imputing earnings on clearing balance investments.

3. Proposed 2004 fee schedules for priced services and electronic connections.

4. Any items carried forward from a previously announced meeting.

Note: This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office and copies may be ordered for \$6 per cassette by calling 202-452-3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

FOR FURTHER INFORMATION CONTACT:

Michelle A. Smith, Director, Office of Board Members; 202-452-2955.

SUPPLEMENTARY INFORMATION: You may call 202-452-3206 for a recorded announcement of this meeting; or you may contact the Board's Web site at <http://www.federalreserve.gov> for an electronic announcement. (The Web site also includes procedural and other information about the open meeting.)

Dated: October 15, 2003.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

National Center on Birth Defects and Developmental Disabilities; Meeting

NAME: Newborn Screening for Cystic Fibrosis (CF).

TIMES AND DATES: 8 a.m.–5:30 p.m., November 20, 2003. 7:50 a.m.–4 p.m., November 21, 2003.

PLACE: Renaissance Atlanta Hotel Downtown, 590 West Peachtree Street NW., Atlanta, Georgia 30308-3586, Telephone (404) 881-6000.

STATUS: Open to the public, limited only by the space available.

PURPOSE: The meeting will review the recommendations from the 1997 Newborn Screening for Cystic Fibrosis: A Paradigm for Public Health Genetics Policy Workshop, and will evaluate the current evidence examining the benefits and risks of screening newborns for CF. In addition, the meeting will review the role of screening, diagnostics, and follow-up issues in CF newborn screening decision-making.

MATTERS TO BE DISCUSSED: The agenda will include an overview of newborn screening; the role of evidence based decision-making; the epidemiology and natural history of the disease; a review of the published and unpublished literature assessing the risks and benefits of screening newborns for CF; discussion about grading the evidence; weighting risks and benefits; planning challenges; screening issues; informed consent; diagnostics and sweat testing referrals, linking screening programs with CF centers for care of diagnosed infants; implications for state programs considering screening; communication; costs; and the evidence to support a public health response to CF newborn screening.

Agenda items are subject to change as priorities dictate.

FOR FURTHER INFORMATION CONTACT:

Scott Grosse, Ph.D., National Center on Birth Defects and Developmental Disabilities, CDC, 1600 Clifton Road, NE, m/s E-87, Atlanta, Georgia 30333, telephone 404/498-3074.

The Director, Management Analysis and Services office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both CDC and the Agency for Toxic Substances and Disease Registry.
