SUPPLEMENTARY INFORMATION:

I. Abstract

The U.S. Census Bureau plans the continuing information collection for the 2003 Annual Capital Expenditures Survey (ACES). The annual survey collects data on fixed assets and depreciation, sales and receipts, capitalized computer software, and capital expenditures for new and used structures and equipment. The ACES is the sole source of detailed comprehensive statistics on actual business spending by domestic, private, nonfarm businesses operating in the United States. Industrial sectors covered by the survey are based on the 1997 North American Industrial Classification System. Both employer and nonemployer companies are included in the survey.

The Bureau of Economic Analysis, the primary Federal user of our annual program statistics, uses the information in refining and evaluating annual estimates of investment in structures and equipment in the national income and product accounts, compiling annual input-output tables, and computing gross domestic product by industry. The Federal Reserve Board uses the data to improve estimates of investment indicators for monetary policy. The Bureau of Labor Statistics uses the data to improve estimates of capital stocks for productivity analysis.

Industry analysts use these data for market analysis, economic forecasting, identifying business opportunities, product development, and business planning.

The major change from previous ACES is the collection of detailed capital expenditures by type of structure and type of equipment for the 2003 ACES from employer companies. Beginning with the 1998 ACES, these detailed data are collected together every five years. These data are critical to evaluate the comprehensiveness of capital expenditures statistics collected in years for which types of structures and equipment detail are not collected. The detailed structures data will provide a 5-year benchmark for estimates of new construction put in place. The detailed equipment data will provide a periodic measure of expenditures by type of equipment and assist in evaluating estimates of private equipment and software component of nonresidential fixed investment. Discussions are currently taking place with data users on the level of detailed type of structures and type of equipment data to be collected.

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect data. Employer companies will be mailed one of three forms based on their diversity of operations and number of industries with payroll. Companies that operate in only one industry will receive an ACE-1 (S) form. Companies operating in more than one, but less than nine industries will receive an ACE-1 (M) form. And, companies that operate in nine or more industries will receive an ACE-1 (L). All nonemployer companies will receive ACE-2 forms. Respondent companies are permitted to respond via facsimile machine using our toll-free number. Companies will be asked to respond to the survey within 30 days of the initial mailing. Letters and/or telephone calls encouraging participation will be directed to companies that have not responded by the designated time.

III. Data

OMB Number: 0607-0782.

Request for additional information or copies of the information collection instrument and instructions should be directed to: Jim Boney, U.S. & Foreign Commercial Service, Export Promotion Services, Room 2116, 14th & Constitution Avenue, NW., Washington, DC 20230; Phone number: (202) 482-0146, and fax number: (202) 482-0115.

SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration's International Buyer Program (IBP) encourages international buyers to attend selected domestic trade shows in high export potential industries and to facilitate contact between U.S. exhibitors and foreign visitors. The program has been successful, having substantially increased the number of foreign visitors attending these selected shows as compared to the attendance when not supported by the program. The number of shows selected to the program increased from 10 in FY 1986 to 28 in FY 2001 and will increase to 32 shows in FY 2004. Among the criteria used to select these shows are: export potential, international interest, scope of show, stature of show, exhibitor interest, overseas marketing, logistics, and cooperation of show organizers.

II. Method of Collection

Form ITA-4014P, Exhibitor Data, is used to determine which U.S. firms are interested in meeting with international business visitors and the overseas business interest of the exhibitors. The exhibitor data form is completed by U.S. exhibitors participating in an IBP domestic trade show and is used to list the firm and its products in and Export Interest Directory which is distributed to international buyer delegation members visiting the event and made available for use by Foreign Commercial Officers in recruiting delegations of international buyers to attend the show.

The Form ITA-4102P, Application, is used by potential show organizers to demonstrate (1) their experience, (2) ability to meet the special conditions of the IBP, and (3) provide information about the domestic trade show such as the number of U.S. exhibitors and the percentage of net exhibit space occupied by U.S. companies vis-a-vis non-U.S. exhibitors.

III. Data

OMB Number: 0625-0151.

Form Number: ITA-4014P and ITA-4102P.

Type of Review: Regular.

Affected Public: Business or other for-profit.

Estimated Number of Respondents: 6,470.

Estimated Time Per Response: 10 minutes and 180 minutes (Avg.).

Estimated Total Annual Burden Hours: 1,277 hours.

Estimated Total Annual Costs: \$63,267.

The estimated annual cost for this collection is \$63,267 (\$44,683 for respondents and \$18,584 for federal government employees).

IV. Request for Comments

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and costs) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Certain Non-Frozen Apple Juice Concentrate From the People's Republic of China: Notice of Extension of Time Limit for the Final Results of the New Shipper Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce

SUMMARY: The Department of Commerce is extending the time limit for the final results of the new shipper review of the

antidumping duty order on certain non-frozen apple juice concentrate from the People's Republic of China. The period of review for the new shipper review of Yantai Golden Tide Fruits & Vegetable Food, Co., Ltd. is June 1, 2002 through November 30, 2002.

EFFECTIVE DATE: October 22, 2003.

FOR FURTHER INFORMATION CONTACT:

Audrey R. Twyman or John Brinkmann, Office of AD/CVD Enforcement I, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone (202) 482-3534 or (202) 482-4126, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 23, 2003, the Department of Commerce ("the Department") issued the preliminary results of the new shipper review for certain non-frozen apple juice concentrate from the People's Republic of China ("PRC") for Yantai Golden Tide Fruits & Vegetable Food, Co., Ltd. ("Golden Tide"), covering June 1, 2002 through November 30, 2002. See *Non-Frozen Apple Juice Concentrate From the People's Republic of China: Preliminary Results of New Shipper Review*, 68 FR 44741 (July 30, 2003) ("Preliminary Results"). The final results are currently due no later than October 21, 2003.

Statutory Time Limits

Section 751(a)(2)(B)(iv) of the Tariff Act of 1930, as amended ("the Act"), requires the Department to issue the final results of a new shipper review within 90 days after the date on which the new shipper review preliminary result is issued. However, if the case is extraordinarily complicated, section 751(a)(2)(B)(iv) of the Act allows the Department to extend this deadline for the final results of the new shipper review to a maximum of 150 days.

Postponement

The Department has determined that it is not practicable to issue the final results within the original time period. This case has become extraordinarily complicated in light of case events. In particular, verification in the PRC that was originally scheduled to occur earlier in the proceeding was delayed due to restrictions on travel to the PRC. The additional time is required in order to allow parties adequate time to comment on the findings of the verification and to comment on the Department's preliminary results. Also, additional time is necessary to analyze data used in the calculation of normal value. Therefore, in accordance with
