Interim Direction for Processing Interstate Natural Gas Pipeline Proposals on National Forest System Lands

AGENCY: Forest Service, USDA.

ACTION: Notice of issuance of agency directive.

SUMMARY: The Forest Service is issuing an interim directive to guide its employees in processing proposals for interstate natural gas pipeline projects. This interim directive is designed to supplement existing direction in the Forest Service Manual chapter 2720, consistent with a May 2002 interagency agreement between the Department of Agriculture and the Federal Energy Regulatory Commission. The agreement establishes procedures for responding to and processing applications for interstate natural gas pipeline projects when the Federal Energy Regulatory Commission will be the lead agency in conducting the required environmental and historic preservation reviews.

DATES: This interim directive is effective October 24, 2003.

ADDRESSES: This interim directive (ID 2720-2003-2) is available electronically from the Forest Service via the World Wide Web/Internet at <http://www.fs.fed.us/im/directives>. Single paper copies of the ID are also available by contacting Melissa Hearst, Lands Staff (Mail Stop 1124), Forest Service, 1400 Independence Avenue, SW., Washington, DC 20250-1124 (telephone 202-205-1196).

FOR FURTHER INFORMATION CONTACT: Melissa Hearst, Lands Staff (202-205-1196).

SUPPLEMENTARY INFORMATION: The Forest Service is issuing an interim directive (ID) to Forest Service Manual (FSM) chapter 2720 to guide its employees in the streamlining of proposal and application procedures for interstate natural gas pipelines certified by the Federal Energy Regulatory Commission (FERC) and adopted in a May 2002 agreement between the FERC, the Department of Agriculture, and other Federal agencies.

The May 2002 agreement entitled "Interagency Agreement on Early Coordination of Required Environmental and Historic Preservation Reviews Conducted in Conjunction with the Issuance of Authorizations to Construct and Operate Interstate Natural Gas Pipelines Certificated by the Federal Energy Regulatory Commission" eliminates overlapping and duplicative environmental processes required by the numerous Federal agencies having jurisdiction in the permitting of interstate natural gas pipeline projects. Minimizing the duplication and overlap of procedures shortens the cumulative processing time for evaluating applications and making decisions on these projects. The ID to FSM 2720 provides Forest Service field officers with specific procedures to ensure that

the agency carries out the streamlining processes in the agreement and directs that field officers fully engage as a cooperating agency in the FERC's processing of these types of applications.

The interim directive to FSM 2720 is issued as ID number 2720-2003-2.

Dated: October 16, 2003.

Associate Chief.

Little Wood River Irrigation District, Gravity Pressurized Irrigation Delivery System, Blaine County, ID

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Draft environmental impact statement availability for review and comment.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Natural Resources Conservation Service Guidelines (7 CFR part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that a draft environmental impact statement has been prepared for a Federally assisted proposed project by the Little Wood River Irrigation District, Blaine County, Idaho.

DATES: Comments will be received for a 45 day period commencing with this date of publication.

FOR FURTHER INFORMATION CONTACT: Richard Sims, State Conservationist, Natural Resources Conservation Service, 9173 W. Barnes Dr., Suite C, Boise, Idaho, 83709-1574, telephone: 208-378-5700.

SUPPLEMENTARY INFORMATION: The preliminary information of this Federally assisted proposed action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, Richard Sims, State Conservationist, has determined that the preparation and review of an environmental impact statement is needed for this project.

The objective of the Little Wood River Irrigation District proposed action is to maximize the conservation and use of irrigation water and the energy required

to irrigate all of the existing cropland within the project area. The proposed project would convert the open canal irrigation delivery system to a closed, gravity pressurized delivery system. Alternatives evaluated were No Action, Gravity Pressurized Irrigation Delivery System with On-Farm Irrigation Systems and Gravity Pressurized Irrigation Delivery System with On-Farm Irrigation Systems and Hydroelectric Generation.

The Little Wood River Irrigation District invites participation and consultation of agencies and individuals that have special expertise, legal jurisdiction, or interest in the preparation of the draft environmental impact statement. A limited number of copies of the EIS are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Richard Sims.

Further information on the proposed action or future public meetings may be obtained from Richard Sims, State Conservationist, at the above address or telephone 208-378-5700.

Dated: October 15, 2003.
