

(OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, (Pub. L. 104-13, 44 U.S.C. Chapter 35). The Corporation has requested OMB to review and approve its emergency request for reinstatement, with change, of a previously approved collection for which approval has expired, by November 7, 2003. A copy of this ICR, with applicable supporting documentation, may be obtained by contacting the Corporation for National and Community Service, National Senior Service Corps, Attn: Ms. Angela Roberts, (202) 606-5000, Ext. 111, or by e-mail at Aroberts@cns.gov.

The Corporation requests that all public comments be sent to the Office of Information and Regulatory Affairs, Attn: Ms. Fumie Yokota, OMB Desk Officer for the Corporation for National and Community Service, Office of Management and Budget, Room 10235, Washington, DC, 20503, (202) 395-3147. Comments should be received by the OMB Desk Officer no later than November 3, 2003.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the Corporation's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Propose ways to enhance the quality, utility and clarity of the information to be collected; and
- Propose ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Type of Review: Emergency request for reinstatement, with change, of a previously approved collection for which approval has expired.

Agency: Corporation for National and Community Service.

Title: National Senior Services Corps Project Progress Report.

OMB Number: 3045-0033.

Agency Number: CNCS Form 1020.

Affected Public: Sponsors of National Senior Service Corps grants.

Total Respondents: 1,350.

Frequency: Semi-annual. It is estimated that 1,350 will respond semi-annually and 50 quarterly.

Average Time Per Response: 8.7 hours.

Estimated Total Burden Hours: 11,000 hours.

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintenance): \$2,000.

The Corporation is soliciting comments concerning a revised version of its National Senior Service Corps Project Progress Report. The previously approved Progress Report (OMB Control Number 3045-0033) expired on August 31, 2003. This emergency request for reinstatement with changes reflects the Corporation's intention to modify selected sections of the collection instrument to reflect changes in data considered "ore reporting" information to meet a variety of needs, including:

- Removing data elements no longer required after January 2004; and
- Adding new data elements as needed to ensure information collection captures appropriate data for the Corporation's required performance measurement and other reporting.

Background

The Progress Report (PPR) was designed to assure that National Service Corps (NSSC) grantees address and fulfill legislated program purposes, meet agency program management and grant requirements, and assess progress toward work plan objectives agreed upon in the granting of the award.

Current Action

The Corporation seeks OMB approval to reinstate the previously used PPR to: (a) Enhance data elements collected via this information collection tool; (b) migrate the paper version of the form to the Corporation's electronic grants management system, eGrants; and (c) establish reporting periods consistent with the Corporation's integrated grants management and reporting policies.

The Corporation anticipates making available to all NSSC grantees an OMB approved revised PPR by April of 2004.

The revised PPR will be used by NSSC grantees to report progress toward accomplishing work plan goals and objectives, reporting actual outcomes related to self-nominated performance measures meeting challenges encountered, describing significant activities, and requesting technical assistance. Submission requirements are proposed to be revised as follows:

- Established multi-year NSSC grantees will submit the complete report semi-annually within 30 days of the end of their annual budget cycle.
- New projects in their first year, new components of statewide projects,

demonstrations, and projects experiencing problems or with substantial project revisions may, upon review and recommendations of project managers, submit the PPR quarterly.

Dated: October 20, 2003.

Tess Scannell,

Director, National Senior Service Corps.

BILLING CODE 6050--\$-P

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement/ Environmental Impact Report (EIS/EIR) for a Permit Application for the Berths 136-147 Terminal Improvement Project, Also Known as the TraPac Container Terminal in the Port of Los Angeles, Los Angeles County, CA

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent (NOI).

SUMMARY: The U.S. Army Corps of Engineers (Corps) Los Angeles District in conjunction with the Los Angeles Harbor Department (Port) is examining the feasibility of waterside, terminal and transportation improvements at Berths 136-147 in the Port of Los Angeles. The Corps is considering the Port's application for a Department of the Army permit under Clean Water Act section 404 and River and Harbor Act section 10 to conduct dredge and fill activities and construct one new wharf approximately 705 feet and seismically upgrade two wharves approximately 3,022 feet in length associated with the proposed project.

Major project elements to be covered in the Draft EIS/EIR include: Wharf construction and landside improvements. The landside developments will include expansion, redevelopment and construction of marine terminal facilities, and transportation infrastructure improvements including construction of grade separations, and potential realignment of road and railways.

The primary Federal involvement is the discharge of dredge and/or fill materials within waters of the United States, work (e.g. dredging) and structures in or affecting navigable waters of the United States, and potential impacts on the human environment from such activities. Therefore, in accordance with the National Environmental Policy Act (NEPA), the Corps is requiring the

preparation of an Environmental Impact Statement (EIS) prior to rendering a final decision on the Port's permit application. The Corps may ultimately make a determination to permit or deny the above project or permit or deny modified versions of the above project.

Pursuant to the California Environmental Quality Act (CEQA), the Port will serve as Lead Agency for the Preparation of an Environmental Impact Report (EIR). The Corps and the Port have agreed to jointly prepare a Draft EIS/EIR for the improvements at Berth 136–147 in order to optimize efficiency and avoid duplication. The Draft EIS/EIR is intended to be sufficient in scope to address both the Federal and the state and local requirements and environmental issues concerning the proposed activities and permit approvals.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and Draft EIS/EIR can be answered by Mr. Joshua Burnam, Corps Project Manager, at (213) 452–3294. Comments shall be addressed to: U.S. Army Corps of Engineers, Los Angeles District, Regulatory Branch. ATTN: File Number 2003–0–1142–JLB PO Box 532711, Los Angeles, CA 90053–2325, and Dr. Ralph Appy, Director of Environmental Management, Port of Los Angeles, 425 S. Palos Verdes St., San Pedro, CA 90731.

SUPPLEMENTARY INFORMATION: 1. *Project Site and Background Information.* The proposed project is located in the northwestern portion of the Port of Los Angeles, adjacent to the San Pedro District of the City of Los Angeles, CA. The proposed project involves dredge and fill operations, new wharf construction, coupled with terminal expansion on adjacent areas of existing land, and improvement of transportation infrastructure at and adjacent to Berths 136–147.

The project's overall goals are to upgrade the container cargo handling efficiency at the Berths 136–147 Terminal, increase its cargo handling capacity, and to improve transportation infrastructure in order to accommodate forecasted and planned increases in the volume of containerized goods shipped through the Port. In order to meet these goals, the following objectives must be met:

- Establish needed container facilities that would maximize the use of existing waterways and integrate into the Port's overall utilization of available shoreline, while maintaining opportunities for the future integration with adjacent terminals;

- Construct sufficient container berthing and infrastructure capacity to accommodate foreseeable increases in containerized cargo volumes entering the Port;

- Create sufficient backland area for optimal container terminal operations including, storage, transport, and on/offloading of container ships in a safe and efficient manner;

- Provide access to rail and truck infrastructure locations in order to minimize surface transportation congestion or delays and promote transport to both local and distant cargo destinations; and

- Provide needed container terminal accessory buildings and structures to support containerized cargo handling requirements.

2. *Proposed Action.* The first phase of construction would consolidate most of this area into a single terminal and upgrade its operations by increasing backland capacity, constructing approximately 705 feet of new wharf, upgrading wharves to handle modern container terminal ships, adding an on-dock rail yard to reduce container truck traffic, constructing two grade separations to facilitate rail and truck shipments, and constructing a noise barrier (with landscaping and recreational facilities) along Harry Bridges Boulevard. The Harry Bridges Boulevard realignment would move the existing roadway approximately 580 feet north toward "C" Street. As a result of these improvements, the gross terminal area would increase in size from 176 acres to 238 acres with a corresponding increase in throughput capacity. The improvements would make the facility more efficient. The proposed project elements for the Phase I construction period include:

Phase I Berth 136–147

- Construction Stage I (completed by 2005)

(1) Construction and operation of a new 705-foot wharf (78,135 square feet) at Berths 145–147. There would be no loss of waters of the U.S.

(2) Dredging of 265,000 cubic yards (cy) of material along the waterfront at Berths 145–147 to match approved-53 MLLW channel depths, with material to be placed at confined disposal site(s) (CDF) at either the Port of Los Angeles or the Port of Long Beach or at an appropriate upland site.

(3) Construction of 179,500 cy of rock dike, placement of 24,000 cy of fill behind the dike, and placement of 699 concrete piles at Berths 145–147.

(4) Construction and development of 62 acres of additional backland area for container storage.

(5) Construct a 3,200-foot long noise barrier between the realigned Harry Bridges Boulevard and residences along "C" Street between Figueroa Street and Lagoon Avenue.

(6) Two existing 50-gauge cranes would be removed and one new 100-gauge crane would be erected. The other four 100-gauge cranes on Berths 142–146 would remain.

(7) Construction of an on-dock intermodal container terminal facility (ICTF) rail yard within the former location of the Pier A rail yard.

(8) Construction and operation of two grade separations at Neptune Avenue and Avalon Boulevard to eliminate potential traffic delays that would otherwise be caused by trains.

(9) Construction of additional terminal gate facilities and accessory buildings.

Phase II Berth 136–147

Proposed improvements in this area would expand backlands for container terminal use and improve wharves to efficiently handle increased cargo throughput and deep draft container ships. The backland expansion would increase the terminal size from 238 acres to approximately 250 acres. The proposed projects elements for the Phase II construction period include:

- Construction Stage II (2005–2010)

(1) Improvements and upgrades to approximately 2,000 feet of wharves at Berths 136–139 including dredging to handle the planned – 53-foot channel depth.

(2) Redevelopment of the vacated area at the Westway and Water Street sites into approximately 14 acres of additional backland.

(3) The existing seven 100-gauge cranes on Berths 136–139 would remain.

3. *Issues.* There are several potential environmental issues that will be addressed in the EIS/EIR. Additional issues may be identified during the scoping process. Issues initially identified as potentially significant include:

(a) Geological issues, including dredging and stabilization of fill areas in an area of known seismic activity;

(b) Impacts to hydrology;

(c) Impacts to air quality;

(d) Impacts to traffic, including marine navigation and ground transportation;

(e) Potential for noise impacts;

(f) Impacts to public utilities and services;

(g) Potential impacts to aesthetic resources, including light and glare;

(h) Potential impacts on public health and safety;

- (i) Cumulative impacts; and
- (j) Disposal of dredged materials.

4. *Alternatives.* Alternatives initially being considered for the proposed improvement project include the following:

(a) Alternate location(s) for the Terminal Improvements (within the State or within the Ports of Los Angeles/Long Beach).

(b) Development of new landfills for a container terminal.

(c) Non-containerized use of terminal (*i.e.*, lumber, autos).

(d) Non-shipping use *i.e.*, park, cruise terminal, commercial development, empty container storage, etc.

(e) No Federal action (No wharf construction or dredging—construction of only backlands developments for Phases I and II) with and without Harry Bridges being relocated.

(f) Larger facility (14-acre fill for more storage area).

(g) Reduce Wharf (reduced fill/reduction in rip-rap, pilings, and dredging).

(h) Proposed project without Harry Bridges Boulevard being relocated.

- (i) No Project (no physical changes).

5. *Scoping Process.* The Corps and the Port will conduct separate, simultaneous English and Spanish language public scoping meeting on November 5, 2003 at 6 p.m., to receive public comment and assess public concerns regarding the appropriate scope and preparation of the Draft EIS/EIR. The meeting will be held at the Wilmington Recreational Center at 325 North Neptune Avenue. Parties interested in being added to the Corps' electronic mail notification list for the Port of Los Angeles can register at: <http://www.spl.usace.army.mil/regulatory/register.html>. This list will be used in the future to notify the public about scheduled hearings and availability of future public notices. Participation in the public meeting by federal, state and local agencies and other interested organizations and persons are encouraged.

6. *Availability of the Draft EIS/EIR.* The joint lead agencies expect the Draft EIS/EIR to be made available to the public in July 2004. A public hearing will be held during the public comment period for the Draft EIS/EIR.

Dated: October 9, 2003.

Richard G. Thompson,

Colonel, U.S. Army, District Engineer.

DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Availability of Government-Owned Invention; Available for Licensing

AGENCY: Department of the Navy, DOD.

ACTION: Notice.

SUMMARY: The invention listed below is assigned to the United States Government as represented by the Secretary of the Navy and is available for licensing by the Department of the Navy. U.S. Patent No. 6,097,785: Cone Penetrometer Utilizing an X-Ray Fluorescence Metals Sensor, Navy Case No. 77,638.

ADDRESSES: Requests for copies of the invention cited should be directed to the Naval Research Laboratory, Code 1004, 4555 Overlook Avenue, SW., Washington, DC 20375-5320, and must include the Navy Case number.

FOR FURTHER INFORMATION CONTACT: Paul A. Regeon, Acting Head, Technology Transfer Office, NRL Code 1004, 4555 Overlook Avenue, SW., Washington, DC 20375-5320, telephone (202) 767-7230. Due to temporary U.S. Postal Service delays, please fax (202) 404-7920, e-Mail: regeon@nrl.navy.mil or use courier delivery to expedite response.

(Authority: 35 U.S.C. 207, 37 CFR part 404.)

Dated: October 21, 2003.

E.F. McDonnell,

Major, U.S. Marine Corps, Federal Register Liaison Officer.

BILLING CODE 3810-FF-P

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Leader, Regulatory Information Management Group, Office of the Chief Information Officer invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before November 26, 2003.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Lauren Wittenberg, Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, DC 20503 or should be electronically

mailed to the internet address Lauren_Wittenberg@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Regulatory Information Management Group, Office of the Chief Information Officer, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, *e.g.* new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: October 21, 2003.

Angela C. Arrington,

Leader, Regulatory Information Management Group, Office of the Chief Information Officer.

Office of Special Education and Rehabilitative Services

Type of Review: Reinstatement.
Title: Written Request for Assistance or Application for Client Assistance Program.

Frequency: 3-year cycle for CAP assurances.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 56.

Burden Hours: 9.

Abstract: This document is used by States to request funds to establish and carry out Client Assistance Programs (CAP). CAP is mandated by the Rehabilitation Act of 1973, as amended (Act), to assist vocational rehabilitation clients and applicants in their relationships with projects, programs, and services provided under the Act.

Requests for copies of the submission for OMB review; comment request may be accessed from <http://edicsweb.ed.gov>, by selecting the "Browse Pending Collections" link and
