AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed Prospective Purchaser Agreement and opportunity for public comment.

This Prospective Purchaser Agreement is subject to a 15 day public comment period, after which the United States, the EPA, and/or the State of Missouri may modify or withdraw their consent to the Prospective Purchaser Agreement if comments received disclose facts or considerations which indicate that this Prospective Purchaser Agreement is inappropriate, improper or inadequate.

SUPPLEMENTARY INFORMATION: New Haven, Missouri is a city with a

population of approximately 1,700 located along the southern bank of the Missouri River in Franklin County, Missouri, approximately 40 miles west of St. Louis, Missouri. In 1986, the hazardous substance tetrachloroethene ("PCE"), was detected in two public-supply groundwater wells in the northern part of New Haven. Following this discovery, two new public-supply wells were installed in the southern part of the city, and several investigations into the source of the contamination were conducted by the Missouri Department of Natural Resources and EPA. The Riverfront Superfund Site is comprised of six operable units. The subject of this Prospective Purchaser Agreement is Operable Unit No. 1 (OU1). OU1 is located in the area of the northeast corner of Front Street and Cottonwood Street, just east of downtown New Haven. Located on OU1 is a 15,000 square foot, one story, concrete block and metal building. The highest PCE concentrations for OU1 have been detected in the soils beneath Front Street along the south side of this building. A plume of groundwater contaminated with PCE and its degradation products trichloroethene, cis-1,2-dichloroethene, and vinyl chloride emanates from this area of soil contamination and extends northward in the alluvium to the Missouri River where it discharges. This plume is not contributing to the PCE contamination that affected the city's closed water supply wells. On September 30, 2003, EPA issued a Record of Decision (ROD) for OU1. The ROD provides for the implementation of a remedial action to address contamination at OU1. The selected remedial action includes the use of an in-well stripper unit to treat contaminated soils and the head of the groundwater plume, as well as groundwater monitoring and institutional controls.

The Prospective Purchaser Agreement would resolve certain claims that the United States and the State of Missouri may have against the Industrial Development Authority of the City of New Haven, Missouri, the prospective purchaser of OU1, pursuant to sections 106 and 107(a) of CERCLA, 42 U.S.C. 9606 and 9607(a), with respect to the existing contamination. In addition, the Industrial Development Authority of the City of New Haven, Missouri will receive protection from contribution actions or claims as provided by section 113(f)(2) of CERCLA, 42 U.S.C. 9613(f)(2), for matters addressed in the Prospective Purchaser Agreement.

Pursuant to the Prospective Purchaser Agreement the Industrial Development Authority of the City of New Haven,
