

2002. In its First Draft Results, pursuant to the analysis followed by the Court, the Department concluded that the record did not support its determination in the investigation that India was a significant producer of AJC. Instead, the Department determined that Turkey was a more appropriate surrogate country for the PRC because it was the country most economically comparable to the PRC that was also a significant producer of AJC.

Accordingly, the Department amended its calculations using Turkish data to value juice apples, SG&A expenses, overhead, and profit. The Department also changed its valuations of steam coal and East Coast freight. Because the Department's recalculated company-specific margins were all zero percent, the Department also recalculated the margin for the separate-rate companies by weighting the calculated margins of zero with the PRC-wide rate of 51.74%, resulting in a separate rates margin of 28.33%.

Comments on the *First Draft Results* were received from all parties on November 12, 2002. On November 15, 2002, the Department responded to the Court's Order by filing its "Redetermination Pursuant to Court Remand." ("*First Redetermination*"). The Department's *First Redetermination* was similar to the *First Draft Results* except for the inclusion of the Department's response to comments submitted by the petitioners and respondents. The final margins in the *First Redetermination* were identical to the *First Draft Results*.

The CIT affirmed, in part, the Department's *First Redetermination* on March 21, 2003. See *Yantai Oriental Juice Co., et al. v. United States and Coloma Frozen Foods, Inc., et al.* Court No. 00-00309, Slip Op. 03-33 (March 21, 2003). The Court affirmed the Department's calculation of company-specific margins but remanded the calculation of the antidumping margin for the separate-rate companies because the Court found that the Department's methodology, weight-averaging the PRC-wide rate and the zero margins, was not supported by substantial evidence on the record.

Accordingly, the "Draft Redetermination Pursuant to Court Remand" ("*Second Draft Results*") was released to the parties on April 18, 2003. In its *Second Draft Results*, the Department reviewed the record evidence and, based on information on the record, calculated a normal value and export price for the separate rate companies. Using this information, the Department calculated estimated margins for the separate rate companies

and weight-averaged these margins with the zero margins for the fully-investigated companies and derived a separate rate of 4.91 percent.

Comments on the *Second Draft Results* were received on April 23, 2003. On May 5, 2003, the Department responded to the Court's Order of Remand by filing its "Redetermination Pursuant to Court Remand." ("*Second Redetermination*"). The Department's *Second Redetermination* differed from the *Second Draft Results* in that in calculating export price, we removed the fully-investigated companies' constructed export price sales, and adjusted our calculations to reflect the different terms of sale. These changes resulted in a weighted-average separate-rate margin of 3.83%.

The CIT affirmed the Department's *Second Redetermination* on November 20, 2003. See *Yantai Oriental Juice Co., et al. v. United States and Coloma Frozen Foods, Inc., et al.* Court No. 00-00309, Slip Op. 03-150 (November 20, 2003).

Suspension of Liquidation

The U.S. Court of Appeals for the Federal Circuit, in *Timken*, held that the Department must publish notice of a decision of the CIT or the Federal Circuit which is not "in harmony" with the Department's *Final Determination*. Publication of this notice fulfills that obligation. The Federal Circuit also held that the Department must suspend liquidation of the subject merchandise until there is a "conclusive" decision in the case. Therefore, pursuant to *Timken*, the Department must continue to suspend liquidation pending the expiration of the period to appeal the CIT's November 20, 2003, decision or, if that decision is appealed, pending a final decision by the Federal Circuit. In the event that the CIT's ruling is not appealed, or if appealed and upheld by the Court of Appeals for the Federal Circuit, the Department will instruct U.S. Customs and Border Protection to revise cash deposit rates and liquidate relevant entries covering the subject merchandise effective the date of publication of this notice in the **Federal Register**.

Dated: December 5, 2003.

James J. Jochum,
Assistant Secretary for Import Administration.

Notice of Final Results of Antidumping Duty Administrative Review: Stainless Steel Sheet and Strip in Coils From France

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of Antidumping Duty Administrative Review of Stainless Steel Sheet and Strip in Coils from France.

SUMMARY: On August 7, 2003, the Department of Commerce ("Department") published the preliminary results of the administrative review of the antidumping duty order on stainless steel sheet and strip in coils from France. The merchandise covered by the order is stainless steel sheet and strip in coils ("SSSS") as described in the "Scope of the Review" section of the Federal Register notice. This review covers imports of subject merchandise from Ugin, S.A ("Ugin"). The period of review ("POR") is July 1, 2001, through June 30, 2002.

Based on our analysis of the comments received, we have made changes in the margin calculation. Therefore, the final results differ from the preliminary results of review. The final weighted-average dumping margin for Ugin is listed below in the section entitled "Final Results of the Review."

EFFECTIVE DATE: December 12, 2003.

FOR FURTHER INFORMATION CONTACT: Cheryl Werner, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-2667.

SUPPLEMENTARY INFORMATION:

Background

On August 7, 2003, the Department published the *Preliminary Results of Antidumping Duty Administrative Review: Stainless Steel Sheet and Strip in Coils from France*, 68 FR 47049 (August 7, 2003) ("*Preliminary Results*"). In accordance with 19 CFR 351.309(c)(ii), we invited parties to comment on our *Preliminary Results*. On September 8, 2003, Ugin and the Petitioners filed comments. On September 15, 2003, Ugin and the Petitioners¹ filed rebuttal comments. We

¹ The Petitioners in this case are Allegheny Ludlum, AK Steel Corporation, North American Stainless, Butler-Armco Independent Union,

have now completed the administrative review in accordance with section 751 of the Act.

Scope of the Review

For purposes of this administrative review, the products covered are certain stainless steel sheet and strip in coils. Stainless steel is an alloy steel containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. The subject sheet and strip is a flat-rolled product in coils that is greater than 9.5 mm in width and less than 4.75 mm in thickness, and that is annealed or otherwise heat treated and pickled or otherwise descaled. The subject sheet and strip may also be further processed (*e.g.*, cold-rolled, polished, aluminized, coated, *etc.*) provided that it maintains the specific dimensions of sheet and strip following such processing.

The merchandise subject to this order is currently classifiable in the *Harmonized Tariff Schedule of the United States* ("HTS") at subheadings:

7219.13.0031, 7219.13.0051,
7219.13.0071, 7219.1300.81²,
7219.14.0030, 7219.14.0065,
7219.14.0090, 7219.32.0005,
7219.32.0020, 7219.32.0025,
7219.32.0035, 7219.32.0036,
7219.32.0038, 7219.32.0042,
7219.32.0044, 7219.33.0005,
7219.33.0020, 7219.33.0025,
7219.33.0035, 7219.33.0036,
7219.33.0038, 7219.33.0042,
7219.33.0044, 7219.34.0005,
7219.34.0020, 7219.34.0025,
7219.34.0030, 7219.34.0035,
7219.35.0005, 7219.35.0015,
7219.35.0030, 7219.35.0035,
7219.90.0010, 7219.90.0020,
7219.90.0025, 7219.90.0060,
7219.90.0080, 7220.12.1000,
7220.12.5000, 7220.20.1010,
7220.20.1015, 7220.20.1060,
7220.20.1080, 7220.20.6005,
7220.20.6010, 7220.20.6015,
7220.20.6060, 7220.20.6080,
7220.20.7005, 7220.20.7010,
7220.20.7015, 7220.20.7060,
7220.20.7080, 7220.20.8000,
7220.20.9030, 7220.20.9060,
7220.90.0010, 7220.90.0015,
7220.90.0060, and 7220.90.0080.

Although the HTS subheadings are provided for convenience and customs purposes, the Department's written

description of the merchandise under review is dispositive.

Excluded from the review of this order are the following: (1) sheet and strip that is not annealed or otherwise heat treated and pickled or otherwise descaled, (2) sheet and strip that is cut to length, (3) plate (*i.e.*, flat-rolled stainless steel products of a thickness of 4.75 mm or more), (4) flat wire (*i.e.*, cold-rolled sections, with a prepared edge, rectangular in shape, of a width of not more than 9.5 mm), and (5) razor blade steel. Razor blade steel is a flat-rolled product of stainless steel, not further worked than cold-rolled (cold-reduced), in coils, of a width of not more than 23 mm and a thickness of 0.266 mm or less, containing, by weight, 12.5 to 14.5 percent chromium, and certified at the time of entry to be used in the manufacture of razor blades. *See* chapter 72 of the HTS, "Additional U.S. Note" 1(d).

Flapper valve steel is also excluded from the scope of the order. This product is defined as stainless steel strip in coils containing, by weight, between 0.37 and 0.43 percent carbon, between 1.15 and 1.35 percent molybdenum, and between 0.20 and 0.80 percent manganese. This steel also contains, by weight, phosphorus of 0.025 percent or less, silicon of between 0.20 and 0.50 percent, and sulfur of 0.020 percent or less. The product is manufactured by means of vacuum arc remelting, with inclusion controls for sulphide of no more than 0.04 percent and for oxide of no more than 0.05 percent. Flapper valve steel has a tensile strength of between 210 and 300 ksi, yield strength of between 170 and 270 ksi, plus or minus 8 ksi, and a hardness (Hv) of between 460 and 590. Flapper valve steel is most commonly used to produce specialty flapper valves in compressors.

Also excluded is a product referred to as suspension foil, a specialty steel product used in the manufacture of suspension assemblies for computer disk drives. Suspension foil is described as 302/304 grade or 202 grade stainless steel of a thickness between 14 and 127 microns, with a thickness tolerance of plus-or-minus 2.01 microns, and surface glossiness of 200 to 700 percent Gs. Suspension foil must be supplied in coil widths of not more than 407 mm, and with a mass of 225 kg or less. Roll marks may only be visible on one side, with no scratches of measurable depth. The material must exhibit residual stresses of 2 mm maximum deflection, and flatness of 1.6 mm over 685 mm length.

Certain stainless steel foil for automotive catalytic converters is also excluded from the scope of this order. This stainless steel strip in coils is a

specialty foil with a thickness of between 20 and 110 microns used to produce a metallic substrate with a honeycomb structure for use in automotive catalytic converters. The steel contains, by weight, carbon of no more than 0.030 percent, silicon of no more than 1.0 percent, manganese of no more than 1.0 percent, chromium of between 19 and 22 percent, aluminum of no less than 5.0 percent, phosphorus of no more than 0.045 percent, sulfur of no more than 0.03 percent, lanthanum of less than 0.002 or greater than 0.05 percent, and total rare earth elements of more than 0.06 percent, with the balance iron.

Permanent magnet iron-chromium-cobalt alloy stainless strip is also excluded from the scope of this order. This ductile stainless steel strip contains, by weight, 26 to 30 percent chromium, and 7 to 10 percent cobalt, with the remainder of iron, in widths 228.6 mm or less, and a thickness between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 50 and 300 oersteds. This product is most commonly used in electronic sensors and is currently available under proprietary trade names such as "Arnokrome III."³

Certain electrical resistance alloy steel is also excluded from the scope of this order. This product is defined as a non-magnetic stainless steel manufactured to American Society of Testing and Materials (ASTM) specification B344 and containing, by weight, 36 percent nickel, 18 percent chromium, and 46 percent iron, and is most notable for its resistance to high temperature corrosion. It has a melting point of 1390 degrees Celsius and displays a creep rupture limit of 4 kilograms per square millimeter at 1000 degrees Celsius. This steel is most commonly used in the production of heating ribbons for circuit breakers and industrial furnaces, and in rheostats for railway locomotives. The product is currently available under proprietary trade names such as "Gilphy 36."⁴

Certain martensitic precipitation-hardenable stainless steel is also excluded from the scope of this order. This high-strength, ductile stainless steel product is designated under the Unified Numbering System (UNS) as S45500-grade steel, and contains, by weight, 11 to 13 percent chromium, and 7 to 10 percent nickel. Carbon, manganese, silicon and molybdenum each comprise, by weight, 0.05 percent

Zanesville Armco Independent Organization Inc., and the United Steelworkers of America, AFL-CIO/CLC.

²Due to changes to the HTS numbers in 2001, 7219.13.0030, 7219.13.0050, 7219.13.0070, and 7219.13.0080 are now 7219.13.0031, 7219.13.0051, 7219.13.0071, and 7219.13.0081, respectively.

³"Arnokrome III" is a trademark of the Arnold Engineering Company.

⁴"Gilphy 36" is a trademark of Imphy, S.A.

or less, with phosphorus and sulfur each comprising, by weight, 0.03 percent or less. This steel has copper, niobium, and titanium added to achieve aging, and will exhibit yield strengths as high as 1700 Mpa and ultimate tensile strengths as high as 1750 Mpa after aging, with elongation percentages of 3 percent or less in 50 mm. It is generally provided in thicknesses between 0.635 and 0.787 mm, and in widths of 25.4 mm. This product is most commonly used in the manufacture of television tubes and is currently available under proprietary trade names such as "Durphynox 17."⁵

Finally, three specialty stainless steels typically used in certain industrial blades and surgical and medical instruments are also excluded from the scope of this order. These include stainless steel strip in coils used in the production of textile cutting tools (e.g., carpet knives).⁶ This steel is similar to AISI grade 420 but containing, by weight, 0.5 to 0.7 percent of molybdenum. The steel also contains, by weight, carbon of between 1.0 and 1.1 percent, sulfur of 0.020 percent or less, and includes between 0.20 and 0.30 percent copper and between 0.20 and 0.50 percent cobalt. This steel is sold under proprietary names such as "GIN4 Mo." The second excluded stainless steel strip in coils is similar to AISI 420-J2 and contains, by weight, carbon of between 0.62 and 0.70 percent, silicon of between 0.20 and 0.50 percent, manganese of between 0.45 and 0.80 percent, phosphorus of no more than 0.025 percent and sulfur of no more than 0.020 percent. This steel has a carbide density on average of 100 carbide particles per 100 square microns. An example of this product is "GIN5" steel. The third specialty steel has a chemical composition similar to AISI 420 F, with carbon of between 0.37 and 0.43 percent, molybdenum of between 1.15 and 1.35 percent, but lower manganese of between 0.20 and 0.80 percent, phosphorus of no more than 0.025 percent, silicon of between 0.20 and 0.50 percent, and sulfur of no more than 0.020 percent. This product is supplied with a hardness of more than Hv 500 guaranteed after customer processing, and is supplied as, for example, "GIN6".⁷

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to this

administrative review are addressed in the "Issues and Decision Memorandum" ("Decision Memorandum") from Joseph A. Spetrini, Deputy Assistant Secretary for Import Administration, Group III, to James J. Jochum, Assistant Secretary for Import Administration, dated December 5, 2003, which is hereby adopted by this notice. A list of the issues which parties raised, and to which we have responded, all of which are in the *Decision Memorandum*, is attached to this notice as an Appendix. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in this public memorandum which is on file in the Central Records Unit, Room B-099 of the main Department building. In addition, a complete version of the *Decision Memorandum* can be accessed directly on the Web at <http://ia.ita.doc.gov/>. The paper copy and electronic version of the *Decision Memorandum* are identical in content.

Changes Since the Preliminary Results

Based on our analysis of comments received, we have made changes in the margin calculation. The changes to the margin calculations include the following: (1) we corrected the double-counting of warranty expenses in the total cost of production calculation; (2) we removed imputed interest expenses from the total cost of production calculation; (3) we deducted commission expenses from the net price used in the arm's-length test; (4) we revised the offset for sales where the commission amount on the matched U.S. sale was zero.

Successorship

We determine Ugine & ALZ France to be the successor to Ugine for purposes of determining antidumping duty liability. For a complete discussion of the basis for this decision see the *Preliminary Results* (68 FR 47051, 47052). No parties have commented on our finding in the *Preliminary Results*. Therefore, Ugine & ALZ France shall be assigned the antidumping duty deposit rate in these *Final Results*.

Final Results of Review

We determine that the following percentage margin exists for the period July 1, 2001, through June 30, 2002:

STAINLESS STEEL SHEET AND STRIP IN COILS FROM FRANCE

Manufacturer/exporter/reseller	Weighted-Average Margin (percent)
Ugine & ALZ France	2.93

The Department shall determine, and U.S. Customs and Border Protection shall assess, antidumping duties on all appropriate entries. The Department will issue appraisal instructions directly to U.S. Customs and Border Protection. For duty-assessment purposes, we calculated importer-specific assessment rates by dividing the dumping margins calculated for each importer by the total entered value of sales for each importer during the period of review.

Cash Deposit Requirements

The following deposit requirements will be effective upon publication of this notice of final results of administrative review for all shipments of stainless steel sheet and strip in coils from France entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for Ugine & ALZ France will be the rate shown above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in these or any previous reviews conducted by the Department, the cash deposit rate will be the "all others" rate, which is 9.38 percent.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that

⁵ "Durphynox 17" is a trademark of Imphy, S.A.

⁶ This list of uses is illustrative and provided for descriptive purposes only.

⁷ "GIN4 Mo," "GIN5" and "GIN6" are the proprietary grades of Hitachi Metals America, Ltd.

reimbursement of the antidumping duties or countervailing duties occurred and the subsequent assessment of double antidumping duties or countervailing duties.

Notification of Interested Parties

This notice also serves as a reminder to parties subject to administrative protective orders ("APOs") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this determination and notice in accordance with sections 751(a)(1) of the Act.

Dated: December 5, 2003.

James J. Jochum,

Assistant Secretary for Import Administration.

Stainless Steel Sheet and Strip in Coils from Italy: Final Results of Antidumping Administrative Review

AGENCY: Import Administration, International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of Final Results in the Antidumping Duty Administrative Review of Stainless Steel Sheet and Strip in Coils from Italy.

SUMMARY: On August 7, 2003, the U.S. Department of Commerce ("Department") published in the **Federal Register** the preliminary results of its administrative review of the antidumping duty order on stainless steel sheet and strip in coils from Italy. *See Preliminary Results of Antidumping Duty Administrative Review: Stainless Steel Sheet and Strip in Coils from Italy*, 68 FR 47032 (August 7, 2003) ("Preliminary Results"). This review covers imports of subject merchandise from ThyssenKrupp Acciai Speciali Terni S.p.A ("TKAST") and ThyssenKrupp AST USA, Inc. ("TKAST USA"). The period of review ("POR") is July 1, 2001, through June 30, 2002.

Based on our analysis of the comments received, we have made changes to our analysis from the preliminary results of review. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margin for the reviewed firm is listed below in the section entitled "Final Results of the Review."

EFFECTIVE DATE: December 12, 2003.

FOR FURTHER INFORMATION CONTACT: Catherine Bertrand or Robert Bolling, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: 202-482-3207 or 202-482-3434, respectively.

SUPPLEMENTARY INFORMATION:

Background

On August 7, 2003, the Department published in the **Federal Register** the preliminary results of its administrative review of the antidumping duty order on stainless steel sheet and strip in coils from Italy. **SEE PRELIMINARY RESULTS.** We invited parties to comment on our preliminary results of review. We received written comments on September 29, 2003, from petitioners¹ and respondents. On October 6, 2003, we received rebuttal comments from respondents and on October 7, 2003, we received rebuttal comments from petitioners.

¹ Petitioners in this case are Allegheny Ludlum Corporation, AK Steel Corporation, J&L Specialty Steel, Inc., North American Stainless, United Steelworkers of America, AFL-CIO/CLC, Butler Armco Independent Union and Zanesville Armco Independent Organization, Inc.

Scope of Review

For purposes of this administrative review, the products covered are certain stainless steel sheet and strip in coils. Stainless steel is an alloy steel containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. The subject sheet and strip is a flat-rolled product in coils that is greater than 9.5 mm in width and less than 4.75 mm in thickness, and that is annealed or otherwise heat treated and pickled or otherwise descaled. The subject sheet and strip may also be further processed (e.g., cold-rolled, polished, aluminized, coated, etc.) provided that it maintains the specific dimensions of sheet and strip following such processing.

The merchandise subject to this review is currently classifiable in the Harmonized Tariff Schedule of the United States (\geq HTUS") at subheadings:

7219.13.0031, 7219.13.0051, 7219.13.0071, 7219.1300.81,² 7219.14.0030, 7219.14.0065, 7219.14.0090, 7219.32.0005, 7219.32.0020, 7219.32.0025, 7219.32.0035, 7219.32.0036, 7219.32.0038, 7219.32.0042, 7219.32.0044, 7219.33.0005, 7219.33.0020, 7219.33.0025, 7219.33.0035, 7219.33.0036, 7219.33.0038, 7219.33.0042, 7219.33.0044, 7219.34.0005, 7219.34.0020, 7219.34.0025, 7219.34.0030, 7219.34.0035, 7219.35.0005, 7219.35.0015, 7219.35.0030, 7219.35.0035, 7219.90.0010, 7219.90.0020, 7219.90.0025, 7219.90.0060, 7219.90.0080, 7220.12.1000, 7220.12.5000, 7220.20.1010, 7220.20.1015, 7220.20.1060, 7220.20.1080, 7220.20.6005, 7220.20.6010, 7220.20.6015, 7220.20.6060, 7220.20.6080, 7220.20.7005, 7220.20.7010, 7220.20.7015, 7220.20.7060, 7220.20.7080, 7220.20.8000, 7220.20.9030, 7220.20.9060, 7220.90.0010, 7220.90.0015, 7220.90.0060, and 7220.90.0080.

Although the HTUS subheadings are provided for convenience and Customs purposes, the Department's written description of the merchandise under review is dispositive.

Excluded from the scope of this review are the following: (1) sheet and strip that is not annealed or otherwise heat treated and pickled or otherwise descaled, (2) sheet and strip that is cut

² Due to changes to the HTUS numbers in 2001, 7219.13.0030, 7219.13.0050, 7219.13.0070, and 7219.13.0080 are now 7219.13.0031, 7219.13.0051, 7219.13.0071, and 7219.13.0081, respectively.
