

Summary: EPA raised environmental concerns that the Proposed Action did not incorporate ground water recharge or reuse/treatment wetland components, which could benefit the Santa Margarita River and its riparian ecosystem. EPA raised concerns that potentially feasible mitigation may not be presented because impacts are not significant, and that no mitigation is proposed for solid waste generated by the project, including demolition waste. EPA requested a discussion of whether polychlorinated biphenyls (PCBs) are present in materials at sewage treatment plants proposed for demolition.
